The Cost of Your postoffice or express money order may, on all orders over \$1.00, be deducted from the amount.

One or Two Cent Postage Stamps. We will accept the same as cash. **Do not send other kinds.**

If You Live on a Rural Mail Route, just give the letter and the money to the mail carrier and he will get the money order at the postoffice and mail it in the letter for you.

Use Our Order Blank If You Have One. If you haven't one, use any plain paper.

Tell Us In Your Own Way What You Want, in any language. Enclose in your letter the amount of money, either a postoffice money order, which you can get at the postoffice, an express money order, which you can get at the express office, or a draft, which you can get at any bank, or put the money in your letter, take it to the postoffice and tell postmaster you want it registered.

Be Sure to Sign Your Name and Address. If by boat or railroad, say distinctly which boat or railroad to ship by, and if freight has to be prepaid, add this amount to your order to prevent delay.

Market Gardeners, Farmers' Clubs and Institutions wanting to purchase seeds in unusually large quantities should write for special prices. We have made prices very low in this Catalogue, yet when a number of bushels or pounds are wanted, we can frequently supply at lower price than by the single pound or bushel. In writing, give us a list of quantities and varieties required, and we will return list promptly with our lowest price for the lot.

Always Remember That We Can Save You Money, No Matter Where You Live. Write us about any seed you would like to know of, and your letter will be answered the same day it is received. If you wish to know exactly what the freight or express would be on any article to your station, write us and we will tell you.

AS TO WARRANTY, We Believe Our Seeds will produce for you the best crops you have ever grown, and to show you what confidence we have in our seeds, if they prove otherwise than represented by us, we will refill your order free of charge; but it must be agreed that we do not warrant the crops grown therefrom, either expressed or implied, as to description, purity, productiveness or any other matter, and we will not be in any way responsible for them. If the purchaser does not accept our seeds, etc., on these terms, they are at once to be returned and the money that has been paid for the same will be refunded. We appreciate your orders and they receive our prompt attention.

GUARANTEE. We Guarantee All Shipments of seeds, including Parcel Post packages, when remittance accompanies order, to reach the purchaser in good condition.

Special Quotations Promptly Given

Leap's Prolific. A splendid new variety. It is remarkable for its productiveness and fine quality of grain. The grain is flintier and of better milling qualities than the ordinary varieties. It is very uniform in its growth, stiff-strawed, healthy, strong grower and early to ripen. One thing particularly noticeable about this variety is its stooing qualities, it being particularly superior in this respect, producing more stalks to plant than the ordinary wheats. This, with the fine, long heads which it produces, means an increase in productiveness, and farmers who have sown this variety are enthusiastic in its praise, claiming it to be the best and most productive variety now on the market. We can recommend this wheat as being superior to other beardless wheats. It has proven its merit in Tennessee, North Carolina, Virginia and Maryland. The yield averages on good land nearly ten bushels to the acre more than other smooth-head wheats.

SMOOTH-HEAD OR BEARDLESS VARIETIES

Harvest King. Grain is a little larger and it is better milling wheat than other short berry wheats. It is really a beardless long berry variety, the grain being as large and as good, if not of better milling qualities, than the Lancaster and Fulcaster.

Fultz Mediterranean. This is a cross of the Fultz and Mediterranean Wheats. The berry is plump and red; chaff white and smooth. Heads of medium length, very compact and well filled. The Fultz-Mediterranean stools well; the straw is long and extremely stiff. Coming from two vigorous, hardy varieties, it is believed to have derived the good qualities of both. It ripens early and has proven a variety of extreme hardiness and great productiveness.

Currells Prolific. It is highly recommended by the Kansas, Maryland and Pennsylvania Experiment Stations. Yields from 30 to 40 bushels side by side with the varieties yielding 20 to 25 bushels. This wheat is giving unbounded satisfaction throughout the South.

Blue Stem. Fine beardless wheat in high favor in the South. Makes best quality of flour.

Miracle or Stoner. This new Wheat originated in the Valley of Virginia, and is one of the best yielding and most uniform growing of bearded wheats. It is particularly recommended on account of its remarkable stooing-out properties. The claim has been made that it is not necessary to sow more than one-half or three-fourths of a bushel per acre to give the same results as ordinary wheat. We will state, however, that on our own farms we have found the best results from sowing it at the rate of one bushel per acre. It makes a fine, heavy grain, of excellent milling qualities, and has proved with us to be one of the best and most prolific of bearded wheats. We recommend it with confidence to our customers.

China. The China Wheat is a new beardless variety which has yielded well and given the best results in this section. It is one of the best milling wheats in existence, and millers always pay the top price for it. It stands adverse conditions of weather better than almost any other variety.

BEARDED VARIETIES

Dietz Mediterranean. A superior long berry variety that has yielded well and given the best results in this section. It is one of the best milling wheats in existence, and millers always pay the top price for it. It stands adverse conditions of weather better than almost any other variety.

Red Mediterranean. This splendid Wheat is very popular in Maryland, Virginia and Pennsylvania. It yields 25 or more bushels of plump grain to the acre and produces over a long ton of straw per acre. It is very heavy, weighing 61 pounds to the struck bushel.

Fulcaster. This is a very valuable and popular cross between the Fultz and the Lancaster. It is one of the most reliable and best yielding varieties. Has exceptionally large heads, stands up well and has proven rust-proof. It brings the highest market price as a milling wheat.

Lancaster. An old standard variety of long berry Wheat, greatly prized by millers, and always selling at the highest market price. It is the best variety for low or stiff grounds.

Harvest Pride. This long berry Wheat is known for its enormous yields.

WINTER RYE

For Winter pasture, early green feed and for turning under as well as for grain. Winter Rye is used all over the South. It can be sown with success as early as July and as late as the last part of December. It is often sown at the last working of corn and cotton and makes as excellent and successful crop grown in this way; it also keeps the soil in better condition for succeeding crops by preventing the leaching by the winter rains. Please write for latest prices.

ROSEN RYE

Rosen Rye is a stiff-strawed, large-headed variety which, when pure, ordinarily has four full rows of grain on over 99 per cent of its heads. Forty to forty-five bushels per acre yields are not uncommon. Please write for prices.

WINTER BARLEY

Barley makes one of the largest and most nutritious crops of pasture or hay. If cut before it is fully headed up it will cure splendidly. In nutritious and feeding qualities it is superior to Timothy Hay. During the Winter and Spring it can be constantly grazed and is ready to cut two weeks ahead of wheat. Please write for latest prices.

Crimson Clover Seed

Bags Extra at Cost

Crimson Clover. Saves Fertilizer bills and increases the Farmers' Income Millions of Dollars. Sow liberally, either alone or at the last working of corn or cotton. It makes the land rich in nitrogen and humus of vegetable matter and puts it in the very best condition for the crops which follow. It also makes a **Fine Winter Cover Crop. A Good Early Forage Crop. An Excellent Grazing Crop During the Late Fall, Winter and Early Spring. A Splendid Soil Improving Crop.** Plowed under early in the Spring it increases the yield of corn, tobacco, cotton or other crops which follow it to a wonderful extent. Thousands of Farmers throughout the Middle and Southern States are rapidly increasing their acreage of Crimson Clover, they have realized its great value—a crop turned under is equal to a heavy application of stable manure. The seeds cost so little per acre and the results considered superior even to Cow Peas. Sow during July, August or September, 15 pounds per acre. If Crimson Clover is cut just as it is coming into bloom, before the seed forms, it will make a first class Hay Crop. Crimson Clover can be used for grazing, early green feed or hay, even then the condition and productiveness of the land upon which it is grown will be wonderfully improved. For Fruit Growers, Corn Growers, Cotton Growers, Tobacco Growers, Dairymen, Truckers and Market Gardeners, Stock Breeders and Large Poultrymen. Crimson Clover has a marvelous value that as yet has only been partially understood and appreciated. Share this year in the Great Saving Crimson Clover is annually making for thousands of farmers. New crop seed, large, bright, golden berries, fine plum p, well matured. Immediate shipment Bolgiano's "Gold" Brand Fancy Crimson Clover. 1 Lb. 14c (Postpaid 20c). 10 Lbs. and over 13c. 100 Lbs. 12c lb. (\$7.20 bu. of 60 lbs.). Prices fluctuate. Will quote you prices at any time upon request.

Bolgiano's "Gold Brand" New Crop
Crimson Clover

Dwarf Essex Rape

Makes Splendid Fall, Winter and Spring Pasturage—
Fine for Cattle, Sheep and Hogs

Rape for fall sowing should be put in in July, August or September. It makes a large-yielding, nutritious, succulent green feed or pasturage all through the fall, winter and early spring. The fattening properties of Rape are said to be very much better than those of clover, and it makes a first-class crop either for sowing alone or for grazing during the fall and winter; can be sown with Crimson Clover. Rape can be successfully sown both in the fall and spring. Early fall seeding, however, gives the best results. Rape is best sown in drills at the rate of 3 to 5 pounds per acre, or it can be sown broadcast, when from 6 to 8 pounds per acre should be used. 1 Lb. 16c (Postpaid 21c). 10 Lbs. and over 12½c. 100 Lbs. 12c. lb. Prices fluctuate. Will quote you prices at any time upon request.

Hairy Vetch (Vicia Villosa)

PURE SEED VERY SCARCE

Vicia Villosa succeeds and produces good crops on poor sandy soils as on good land; grows to a height of 4 to 5 feet. It is perfectly hardy throughout the United States, remaining green all winter; should be sown liberally from July to November, with winter rye, oats, wheat or barley, which serves as a support for the plants. It is the earliest crop for cutting, being hardier and nearly a month earlier than Crimson Clover, and a full crop can be taken

off the land in time for planting spring crops. Every Dairyman and Stock Breeder in the United States should have a field of it, and if you try it once and see its value you will never be a season without it. It is exceedingly nutritious, eaten with relish and may be fed with safety to all kinds of stock. Crop short. 1 Lb. 30c. 10 Lbs. 28c lb. 100 Lbs. 27c lb.

Cow-Horn Turnip

326. **Long White Cow-Horn Turnip.** It has been found by practical farmers that there is no better way for aerating and adding humus to the soil in the Winter time than by sowing Long White Cow-Horn Turnips. They can be fed to the stock as they are needed, and the rest allowed to remain in the ground and rot.

having a valuable fertilizing property. They grow nearly half out of the ground and are carrot-like in form. Sow two pounds of seed to the acre, broadcast. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 25c. Lb. 85c. 5 Lbs. at 75c lb.

Mammoth Russian Sunflower

1211. Sunflower has proved to be the best paying crop of anything that has been planted during the last two years. Sow in March to July, 5 to 10 lbs. per acre. Plant with Corn drills in rows 3 to 3½ feet apart and thin to 1 plant every 18 to 22 inches, cover very lightly, not over 2 to 2½ inches, the less the better. Lb. 15c. 10 Lbs. 13c lb. 100 Lbs. 12c lb.

Spring Vetches or Tares

1150. Closely associated with Peas in character. Used for the same purpose as Hairy Vetch, but must be planted in the Spring wherever the Winters are severe, as this variety is not so hardy as Hairy Vetch. Highly valuable for soiling or for green manuring. Sometimes grown with Oats for mowing and feeding to stock. Thrives best in well-drained soil, doing best in loams or sandy loams, though excellent crops are grown both on sandy and gravelly soils. Sow alone 70 to 90 pounds per acre, and if with Oats 60 pounds of Vetch and 40 pounds Oats. Sow in Spring while the ground is cool and moist or in early Autumn. "Gold" Brand, 1 Lb. 12c (Postpaid 18c). 10 Lbs. or over 8½c lb. 100 Lbs. 7½c lb. Prices fluctuate. Will quote prices at any time you request.

Oregon Vetch

1275. Same as Spring Vetch, but owing to its hardness is known as Oregon or Winter Vetch. It can be planted in the Fall in all of the Southern States as well as in the Spring with results about the same as Hairy Vetch. Sown alone, sow 70 to 90 pounds per acre. Sown with Oats, sow 60 pounds Vetch and 40 pounds Oats. Please write for lowest prices.

We Will Scarify Your Sweet Clover or Alfalfa for one cent per pound above our listed prices.

One-Year Old 5-Pound Vetch Root

Enormous Crops of Hay are Produced from Bolgiano's "Gold" Brand Alfalfa Seeds

ALFALFA

One of the most valuable leguminous hay and forage crops cultivated in the United States. It has been grown experimentally and successfully in every State and Territory. It is a strong perennial plant, which is able to live thirty years or more under favorable conditions when properly cared for.

The proper development of Alfalfa largely depends on the soil. It can be grown on many kinds, from sand or sandy loams to heavy clays. It thrives best in deep loams with open, porous sub-soil, where tap roots are not hindered, as the root penetrates to a considerable depth. The quality of the sub-soil is of great importance. If it is compact and impenetrable it will be a serious obstacle to successful Alfalfa growing. The soil must, therefore, be kept well drained, especially in early Spring. In poorly drained field Alfalfa will be injured and sometimes killed in the low spots where water has accumulated. Alfalfa, like other leguminous plants, depends on the bacteria or nitrogen for its vigorous development. Therefore, it is necessary to use bacteria inoculation in treating the seed before sowing. This will supply the young plants with the necessary nitrogen for a quick start, and will prove advantageous to your stand of Alfalfa.

The seed bed should be thoroughly prepared. One of the best ways to prepare your land for Alfalfa is to sow cow peas and soja beans about May 15th, plow the forage under, harrow and roll immediately after plowing to hold the bacteria under soil that are in the nodulus on the roots of the cow peas and soja beans. This forage should be plowed under not later than the 15th of August. After the rolling, ground stone lime should be used at the rate of 1,000 lbs. per acre. It will be best to apply the lime through a drill and roll immediately after liming. This will give you a solid seed bed for sowing your Alfalfa the last of August or the first of September. Twenty pounds should be used to the acre and be very careful not to cover the seed more than one-half inch.

Bolgiano's "Gold" Brand Alfalfa seed that we are offering is non-irrigated seed, best adapted for all localities.

1 Lb. 45c (Postpaid 50c). 10 Lbs. or over 44c lb. 100 Lbs. or over 43c lb. \$25.80 for 60-lb. bu. Prices fluctuate. We will quote prices any time upon request.

1130. **Medium Red Clover.** This is regarded as the most valuable of the Clover family and is largely used for pasturage and hay. Clover adds greatly to the fertility of the land on which it is grown. It does not exhaust the soil, but enriches it. It makes two crops each year. The first is usually cut when it is in blossom for hay. The last crop may be harvested for seed, cut for hay or plowed under to add fertility to the soil. For Hay it is particularly well adapted for sowing with Orchard and Tall Meadow Grass; as it ripens at the same time, and sowing these three grasses together will give larger yields and better quality hay than sowing either alone. It is also largely sown with other grasses, both for hay and pasturage. Information as to quantities required per acre when sown in combination with other grasses will be found under the heading of Orchard Grass, Tall Meadow Oat Grass and Timothy. When sown by itself, sow 10 to 12 lbs. to the acre, either in the Spring or Fall or at the last working of Corn. Price: "Gold" Brand Fancy Red Clover Seed, Lb. 49c (Postpaid 54c). 10 Lbs. or over 47c lb. 100 Lbs. at 46c. (\$27.60 per bu. of 60 lbs.) Prices fluctuate. We will quote prices at any time upon request.

BAGS EXTRA AT COST.

1131. **Mammoth or Sapling Clover.** Is similar to Red Clover in appearance of seeds and habits of growth, the difference being larger growth and later maturing. It is often used for hog pastures. As a soil improver to plow under it is considered superior on account of its extra growth. It is a good variety for thin soils or to seed with Timothy, Meadow Fescue, Herd's Grass or Red Top, as it matures about the same time as these grasses. Sow 10 to 12 lbs. to the acre when sown alone. When sown with Timothy use 6 lbs. Sapling Clover and 8 lbs. Timothy to the acre. Price: "Gold" Brand Fancy, Lb. 51c (Postpaid 56c). 10 Lbs. or over 49c lb. 100 Lbs. at 48c lb. (\$28.80 per bu. of 60 lbs.) Market fluctuates. We will quote prices at any time upon request.

1132. **Alsike Clover.** Alsike Clover grows thicker and is finer in growth than Red Clover, making better hay and probably more and better grazing. It is also hardier, resisting extremes of heat and drought and also severely cold weather to a remarkable extent. It is perennial and does not Winter kill. It succeeds on a variety of soils, light upland loamy lands as well as stiff bottom lands. It will do better on moist land than any other Clover. It is surer to give a good stand and make good crops than either the Red or Mammoth Clover, and in sections where these Clovers have been uncertain Alsike is superseding them altogether. When sown with other grasses it forms a quick undergrowth and greatly increases the yield. It is well adapted for sowing with Red Clover, Timothy, Herd's Grass, as it matures with these grasses, but flowering a little later than Red Clover. Price: "Gold" Brand Seed, 1 Lb. 51c (Postpaid 56c). 10 Lbs. or over 49c. 100 Lbs. at 48c lb. (\$28.80 bu. of 60 lbs.) Prices fluctuate. We will quote prices at any time upon request.

1133. **White Clover.** This is largely used in lawn and permanent pasture mixtures, and is indigenous to the soils throughout the Middle and Southern States. It makes a small, close, compact growth, covering the ground like a carpet. It affords excellent food for bees. Sow in either Spring or Fall. When sown by itself, at the rate of 5 to 6 lbs. per acre. It is better, however, sown in mixture with other grasses. Price: "Gold" Brand Fancy, 1 Lb. 58c (Postpaid 63c). 10 Lbs. or over 57c. 100 Lbs. at 55c lb.

1113. **Japan Clover.** We do not recommend this Clover for land that can be successfully grown in any grasses or clover, but on waste land or poor, worn-out soils it will furnish excellent, nutritious pasturage. Sow at the rate of 10 lbs. per acre, in March or April. Lb. 41c (Postpaid 46c). 10 Lbs. at 40c lb. 100 Lbs. at 39c lb. Prices fluctuate. We will quote prices any time upon request.

1205. **White Blossom Sweet Clover or Bokhara.** (Hulled.) Melilotus Alba. A strong growing perennial of value for green manuring, especially South; also largely grown for the excellent food it affords throughout its season for bees. Sweet Clover will provide more feed per acre than any other form of grass. One farmer declares that five acres of Sweet Clover carried more stock than 40 acres of Timothy and Clover would. Sweet Clover stands drought well and does not cause stock to bloat. Sweet Clover is especially valuable for building up worn-out soils and grows almost anywhere except in acid soils. Sweet Clover is a legume, having the same bacteria on its roots that grow on Alfalfa, consequently it supplies nitrogen to the soil and prepares the way for Alfalfa. Sow 15 to 20 pounds per acre. "Gold" Brand, Lb. 30c (Postpaid 35c). 10 Lbs. at 28c lb. 100 Lbs. at 27c lb. Prices fluctuate. We will quote prices any time upon request.

BAGS EXTRA AT COST

BOLGIANO'S "BIG CROP" TIMOTHY

BAGS EXTRA AT COST

TIMOTHY

1117. **Timothy.** Of Hay Grasses Timothy is one of the most popular, nutritious and salable. On clay or heavy loams, lowlands or in mountainous districts, provided there is an abundance of moisture, it produces the very best results. On sandy or light loamy ground it does not do so well as Orchard, Tall Meadow Oat or Red Top Grass. If grazed or cut too close, the stand of Timothy will be seriously injured, besides it does not form as good grazing as many other grasses. The yield of Hay is from 1½ to 3 tons per acre. Timothy requires good land to make good crops. It does not root as deeply and is not considered as much of an improver as other grasses, consequently should not be sown on land deficient in humus or vegetable matter nor on soils of a light or sandy nature. Clovers grow well with Timothy and aid it by supplying nitrogen. Timothy alone a peck (11 lbs.) to the acre or with Clover 10 lbs. Timothy and 6 lbs. Clover. A splendid mixture is 8 lbs. Timothy, 6 lbs. Clover (either Mammoth Clover or Alsike Clover preferred, as they mature at the same time as Timothy), 6 lbs. Fancy Red Top, ½ bu. Meadow Fescue. Together these will produce most excellent hay, also nutritious and abundant pasture in good loamy clay on low ground soils; 8 lbs. Timothy and 6 lbs. Clover when sown together. Price: "Gold" Brand, Lb. 20c. (Postpaid 25c). Pk. \$1.75. ½ Bu. \$3.25. Bu. \$6.00. 5 Bu. lots and over at \$5.90 per bu. Prices fluctuate. We will quote prices at any time upon request.

KENTUCKY BLUE GRASS.

1118. **Kentucky Blue Grass.** This Grass is not only the best for lawn purposes, but makes the sweetest and most nutritious pasture for all kinds of stock. Kentucky has long been famous for its high-bred horses and its Blue Grass pastures. It is now possible to establish on most any farm a Blue Grass pasture of greenest verdure which will give very profitable returns. This Grass is the first to start up in the Spring, and remains green until snow flies in the Fall. It is very hardy and is uninjured by cold or dry weather, hot sun or tramping of hoofs. The roots are so thick and stout that they form a tough sod. Blue Grass requires about two years to get well started, and for that reason it is often sown in mixture with other Grasses. It will do well on almost any land, but does best on well-drained clay land. Sow in the Fall or Spring at the rate of two or three bushels per acre. Price: "Gold" Brand Seed, Lb. 35c (Postpaid 40c). Pk. \$1.25. Bu. \$4.25. Prices fluctuate. We will quote prices at any time upon request.

CANADA BLUE GRASS

1120. **Canada Blue Grass.** Resembles somewhat the Kentucky Blue Grass. It will thrive even on hard clay soil where there is not quite enough lime and fertility for Kentucky Blue Grass, and having an excellent root development forms a heavy turf. At the Maryland Experiment Station this Grass remained a luxuriant green during the hottest Summer when other Grasses were materially affected by the heat. Being a Grass of Canadian growth it stands the cold weather admirably. Canadian Blue Grass does not thrive when planted with Clover, Red Top and Orchard Grass as the best for mixing with it to grow on inferior soils. On good land it becomes tall enough for hay, and as it shrinks very little in drying the hay is heavy for its bulk. Grows from one to two feet high. Sow 30 lbs. of seed to the acre. Price: "Gold" Brand Seed, Lb. 25c (Postpaid 30c). Pk. \$1.00. Bu. \$3.25. Price fluctuate. We will quote prices at any time upon request.

RED TOP OR HERD'S GRASS

1111. **Red Top or Herd's Grass.** This Grass makes excellent pasturage and good crop of fine quality hay, and succeeds on a greater variety of soils than any other in general use, giving very good results on light soils. The place for Red Top is on rather moist soil, deficient in lime and fertility. It will grow where the soil is too poor for Timothy and Kentucky Blue Grass. It is a good variety to sow with Timothy and Clover for meadow or pasture and is more permanent than either of the other two. It should be fed close, as if it is allowed to grow up to seed the cattle dislike it. On good soil it grows about two feet high; on poor, gravelly land about half that height. It has been grown successfully even on alkali land where other grasses failed. Red Top, commonly known as Herd's Grass, should be extensively grown, especially with other grasses.

Red Top has interlacing, thick roots which made a firm sward not likely to suffer injury from the hoofs of animals. It stands the effect of drought better than Timothy. It is more permanent if it is grazed off and not allowed to go to seed. For the best quality of hay, it should be cut when in full flower. It is more easily cured than almost any other grass. It is rather late in starting in Spring and matures its crop the same time as Timothy. When it gets well established it spreads and will gradually supplant other grasses. Red Top is also one of the best grasses for hillsides or lands likely to wash. Our "Gold" Brand of the Fancy Clean Red Top is of extra fine quality, and carefully cleaned from impurities. We can also furnish the Choice and Prime Fancy Red Top as usually sold. It requires about 8 to 10 pounds to seed an acre of the Fancy Clean seed. When sowing with Timothy, sow 6 pounds of the Fancy Clean Seed and 8 pounds Timothy per acre. It can be sown either in the Spring or Fall. "Gold" Brand Fancy Seed, Lb. 25c (Postpaid 30c). 10 Lbs. or over 20c lb. 100 Lbs. or over 18c lb. (\$5.40 for 30-lb. bu.) Prices fluctuate. We will quote special prices at any time upon request.

MEADOW FESCUE, RANDALL OR ENGLISH BLUE GRASS

1122. **Meadow Fescue, Randall or English Blue Grass.** It makes a most excellent hay and pasturage Grass, and is particularly valuable for Fall and Winter pasturage, as it remains green throughout the Winter. It is also a splendid Spring and Summer Grass and usually makes more and thicker leafage than any other Grass. Grows 2 to 3 feet high, but not in tufts like Orchard Grass. The hay is very nutritious and cattle thrive on it whether dry or green. Succeeds even in poor soil, and as the roots penetrate deep, from 12 to 15 inches, it takes extremely dry weather to affect it. It succeeds well in nearly all sections of the South, and should be very largely used for pasturage and hay mixture, being especially suitable for sowing with Red Top and Timothy for hay, or with these and Orchard and Tall Meadow Oat for permanent pasture. Sow either in the Spring or Fall at the rate of 2 bushels to the acre if sown by itself. When sown with Red Top or Timothy sow 1 bushel (14 lbs.) Meadow Fescue, 5 lbs. Fancy Clean Red Top and 6 lbs. Timothy per acre. Sown for grazing mixture with Orchard and Tall Meadow Oat Grass, add half a bushel each of these two Grasses. Please write for lowest prices.

These Mixtures give the very best and most satisfactory results to customers, and our trade in them is increasing rapidly. The advantages of sowing grasses and clover seed in mixtures has long been recognized and the practice is increasing to a very remarkable extent throughout the South.

We have the following mixtures combined grasses suitable for the various soils and uses for which they are recommended. Those for permanent pastures are composed of grasses which succeed each other in growth, and give a succession from the first of Spring until late in Winter, while

for those desired more for cutting for hay have combined grasses which ripen together. In all our mixtures we are introducing small quantities of Alfalfa Clover with the idea of inoculating the land with Alfalfa bacillus. Alfalfa revolutionizes farming, but the bacillus must be established before the revolution can occur. The different mixtures are prepared both as to quantity and varieties as best adapted to the soils and situations for which they are recommended. In all of our grass mixtures we use the very best seeds, the quality and purity of our seeds being our first consideration. Prices fluctuate. We will quote special prices at any time upon request.

Orchard Grass. One of the best grasses for winter pastures, it makes a good growth on wet and heavy clay soils with ordinary field treatment. In the first warm days of February it commences a thrifty growth, and if not pastured is ready to cut for hay in April. With the first Fall rains it springs into life and furnishes an abundance of excellent grazing throughout the entire winter months. The hay made from Orchard Grass is of excellent quality and should be cut when in blossom. Sown alone, use 30 to 40 pounds per acre or sow 8 to 10 pounds Red Clover, 20 to 30 pounds of Orchard Grass mixed per acre. It can also be sown with excellent results with Tall Meadow Oat Grass. Mixture No. 10. Shady Nook Meadow Mixture. Like our Shady Nook Lawn Mixture, this mixture is specially prepared for good loamy soil in partially shady situations. A fine permanent pasture mixture, yields large crops of hay. Sow 30 to 35 lbs. to the acre. Lb. 25c (Postpaid 30c). 10 Lbs. at 22c lb. 100 Lbs. at 21c per lb.

Tall Meadow Oat Grass. Also called Evergreen Grass. It is not strange that this grass is becoming so popular; the drought of mid-summer or the cold of winter does not injure it. It starts growing very early in the spring; can be cut twice for hay; will yield good grazing until late in the Fall. For hay it should be cut in bloom. Tall Meadow Oat Grass is best adapted for rather light and dry loamy uplands, but gives excellent results on nearly all soil. Sown alone, use 1 to 3 bushels to the acre either Fall or Spring; sown in mixture, use 1 bushel Tall Meadow Oat Grass, 1 bushel Orchard Grass and 6 pounds Red Clover. Lb. 35c (Postpaid 40c). Pk. 90c. SUDAN GRASS

It is a tall, annual grass, reaching a height of 7 to 9 feet when planted in rows and allowed to mature for seed crop; broadcast and cut in the bloom for hay about 4 feet. It is easily cured and handled as a hay crop. Stock of all kinds eat it readily and will leave any other hay for it. The food value is second only to Alfalfa. Three tons of cured hay per cutting per acre has been secured, and three cuttings made. It is a great drought resister and is particularly adapted to semi-arid regions. It is an annual and must be seeded each spring. When seeded in rows 18 to 20 inches apart, drill 4 to 6 pounds. When sown broadcast, 16 to 24 pounds per acre. 1161. VIRGINIA GRAY WINTER OR TURF OATS

When sown early, before the Middle of March, these Oats will far outyield the ordinary Spring Oats, making a larger crop and heavier grain. For seed purposes, too, it is most desirable to sow Winter Oats in the Spring, as they make a better and cleaner seed Oats for sowing in the Fall than if continual seedings are made from the Fall-grown Oats. Further North than Virginia remarkable results have been obtained from these Oats, when sown even as late as the first of May, and from the reports of our customers, we strongly recommend these Oats to our Northern and Western farmers, as we believe they will give much larger and better yielding crops than the Spring Oats usually sown in the Northern and Western States. Sow at the rate of 1½ to 2 bushels per acre. Please write us for lowest prices.

1272. Appler Oats. The Appler Oat is equally adapted for sowing both in the Spring and in the Fall, but when sown in the Spring should be sown before the middle of March. It is a strong, quick growing Oat, bushy head and heavy grain. One of the best and most reliable Rust-proof Oats for the South. Please write for lowest price.

BURT, OR 90-DAY OATS.

Wherever this Oat is grown it speedily comes into favor. It is free from rust, healthy, clean and vigorous growth of straw, and makes a remarkable good yield of clean, bright, heavy grain. One of the surest cropping varieties of the South. Write for lowest prices.

SPELTZ, OR EMMER

1210. Culture. Prepare your ground as you would for wheat or oats, sow at the rate of two bushels per acre. It is extremely hardy and can be sown earlier than Spring wheat or oats, as light frost does not affect it; it can be sown later, but early sowing is better. Please write for lowest prices.

BUCKWHEAT

Buckwheat. For a late Summer crop Buckwheat is very desirable and profitable, especially in mountainous sections. It is easily grown, makes splendid flower food for bees and of a large yield of grain, which can usually be sold for remunerative prices. As a smothering crop, where the land contains objectionable weeds, it is very desirable, and it puts the soil in admirable condition for crops to follow.

1160. Japanese Buckwheat. It has the advantage of remaining for some time in bloom and produces seed earlier. It resists drought and blight very well. As much as 40 bushels to the acre have been harvested, making it very profitable to raise. Sow 1 bushel per acre. Pk. 90c. Bu. \$3.00.

1178. Silver Hull Buckwheat. A prolific and favorite sort, making a fine quality flour. A superior variety in every way to the ordinary Buckwheat, which it has almost entirely superseded. Pk. 90c. Bu. \$3.00.

MILLETS

A Splendid Quick-Growing Summer Hay Crop

TRUE TENNESSEE-GROWN CULTIVATED

GERMAN MILLET

Anyone desiring to use it for hay would be greatly benefited by using our True Tennessee Cultivated Golden Millet in preference to other varieties, as it is fine stock and produces more abundantly nutritious hay than other varieties. Those people who know the difference or care always prefer the True Tennessee Golden Millet rather than the commoner sorts, as they know that the returns from a crop of this kind would be fourfold more than from the commoner variety. It is sown at the same time as the other varieties and at the same rate per acre. Our crop has been carefully re-cleaned, and put into the very best possible condition, and is ready to be sown. Sow one to one and one-fourth bushels per acre, broadcast. True Tennessee-Grown German Millet. Please write for lowest prices.

GERMAN MILLET

Choice Southern-Grown. True Southern Golden Millet produces a fine crop of the best hay in six to eight weeks' time and on good land yields two to two and a half tons per acre. It is of special importance, however, to secure the best Southern-Grown True Golden Millet. If common seed is used, or if Golden Millet is mixed with common Millet, the yield is greatly lessened and renders the hay of less value, because common Millet grows very much smaller, has very little leaf growth, goes to seed quicker, thus interspersing with the hay woody fibre and more or less seed, both of which are extremely objectionable, besides greatly curtailing the crop. True Golden Millet produces a large and luxuriant growth of foliage, has very large heads which ripen evenly, and if cut when in bloom is extremely palatable. Sow broadcast one bushel per acre. Two crops can be seeded and grown during the Summer on the same land. Price Southern-Grown German Millet. Pk. 90c. Bu. \$3.25. 5 Bu. lots at \$3.00.

Grow a Green Blanket to Protect Your Soil During the Winter

Legume crops (Alfalfa, Clovers, Vetches, etc.), are best for cover crops. They keep your surface soil on your own farm and prevent its being washed away into some stream or on to your neighbor's land. They enrich your soil in nitrogen—the most important fertilizer, as well as the most expensive to buy. Inoculate All Your Legume Seeds With

Mulford Cultures

FOR LEGUMES

Alfalfa plant on left not inoculated. Plant on right inoculated with Mulford Culture for Alfalfa. All other conditions identical. This contrast speaks for itself.

Small Cost Large Returns
Easy to Use No Labor Expense

MULFORD CULTURES will supply your legume crop with billions of nitrogen-collecting bacteria. These bacteria will be busy all winter long gathering free nitrogen from the air and storing it in your soil for following crops.

Furthermore, MULFORD CULTURES will make your clover, vetches and other legume crops bigger, stronger, healthier — will make them richer as feed crops and more profitable as fertilizing crops.

An inoculated cover crop planted each Fall will always keep your soil well supplied with humus and nitrogen—will insure your land against weeding out.

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.

Fertilizers for the Farm, Garden and Lawn

We present a list of our brands of Fertilizers. You cannot judge the merits of a Fertilizer only by the analysis, but you must have a knowledge of the basis from which it has been made.

It is a well-known fact that the animal waste products produced in the abattoirs give the purest and most available basis for Ammonia and Phosphoric Acid. This is the basis of our goods. The company that manufactures our Fertilizers own and control a sufficient number of abattoirs to secure for our goods this unexcelled source for our plant food. The expense is almost as much working and reaping one-half a crop as it would be harvesting a full crop, which a good fertilizer would help to produce.

The four columns in the Analysis represent the following ingredients respectively: Ammonia, Phosphoric Acid, Potash, Bone of Phos. of Lime.

Bolgiano's Druid Hill Park Velvet Green Lawn Grass Seed

Analyzed as to Purity

Used by the Leading Landscape Gardeners of The United States

Tested as to Germination

If sown this Fall will quickly produce a most beautiful velvet green lawn. It is perfectly hardy and will stand the severest winter.

Our Druid Hill Park Velvet Green Lawn Grass is very quick in growth, and is ready for mowing in from four to six weeks from time the seed is sown.

Lawns sown with our Druid Hill Park Velvet Green Lawn Grass remain green and fresh, for the reason that this mixture includes quick-growing varieties which are at their best soon after the frost is out of the ground, others that mature and flourish in Midsummer, and still others that are greenest and sturdiest in Autumn. For each of these seasons there are several different varieties living on different elements in the soil, so that one is certain always to have a satisfactory carpet of green wherever our Druid Hill Park Velvet Green Lawn Grass is sown.

Not only is our Druid Hill Park Velvet Green Lawn Grass suitable for making of new lawn, but it will be found equally valuable for quickly renewing imperfect, old and worn-out areas. Always see that the soil is thoroughly prepared, carefully pulverized and enriched with Sheep Manure, Bone Fertilizer or Hydrated Lawn Lime before sowing the seed. One pound will sow 20x20 feet, 10 pounds will sow 50x100 feet, 60 pounds will sow an acre, 30 pounds measures one bushel. $\frac{1}{4}$ Lb. 15c. $\frac{1}{2}$ Lb. 20c. Lb. 35c. 5 Lbs. \$1.50. Bolgiano's Hydrated Lime

After carefully testing all the different limes we find the Hydrated has given the very best results. It cures the acidity of the soil and produces strong, healthy, green sods. It is a sanitary and helpful fertilizer. Some of the finest lawns and grass plots have been produced by the judicious use of Hydrated Lime. If the ground is showing signs of a green cast or moss, use Hydrated Lime at once to save your lawn from the acidity or sour effect that will accumulate. It is a well known fact that 100 per cent of the lawns need Hydrated Lime. More than 50 per cent of grass seed sown is wasted on account of the sour condition of the soil. A generous application of Hydrated Lime being used two weeks before seeding time will prove very beneficial. It can be applied in early Spring or late Fall with the very best results. We advise when making new lawns, especially where top soil is being used, to apply very freely Hydrated Lime before seeding. Sow broadcast 25 pounds to 300 square feet or 2,000 pounds to the acre. Price per 50 Lbs. 75c. 500 Lbs. \$5.00. 1,000 Lbs. \$9.00.

Livingston's Globe Tomato

Thousands of Dollars Are Made Annually by the Southern Shippers on Livingston's Globe Tomato.

Bolgiano's Reselected and Improved Stock.

We annually sell thousands of pounds of our improved strain of this wonderful Tomato to the most critical commercial truckers of the South. Our stock is well known among the largest growers.

The size and shape of Livingston's Globe Tomato makes it a wonderful seller. It is among the earliest and on account of the toughness of its skin, it stands long shipments to Northern markets.

In shape it is distinct from all others, being a beautiful globe, with quite a good percentage of elongated (stem to blossom) fruits. It is among the first to ripen. Fruit of large size, and good marketable size is maintained throughout the season; always smooth, firm-fleshed and has very few seeds. Ripens evenly through and through; a fine, glossy rose in color, tinged with purple. The plant is always loaded with fruit, as it has joints at frequent intervals and each joint produces large clusters of from 3 to 7 fruits. Especially adapted for slicing or eating from the hand, as the flavor is very delicate and agreeable.

71 Bolgiano's French Golden Self-Blanching Celery

Won the Blue Ribbon at the South Florida Fair held at Tampa, February 15-22, 1919

This Wonderful Celery Is Used Exclusively by the Largest and Most Experienced Celery Growers All Over the World and Annually Produces Enormous Profits.

This Is the Finest Stock in the World—Stands Shipment Better Than Any Other.

Many of the Large Growers Around the Sanford, Florida, District Place Their Orders With Us Six Months and a Year in Advance to Be Certain of Obtaining This Perfect Stock of Seed.

Bolgiano's French Grown Golden Self-Blanching Celery is of the most Superb Quality. Its crispness and tenderness and its delightfully rich, nutty, appetizing flavor makes it the leading variety in any market. The stalks are large, solid and a beautiful, rich golden yellow, entirely free from stringiness. It is an excellent keeper, stands shipment better than any other sort and brings the highest market prices. It is a vigorous, dwarf grower, compact in growth and self-blanching to a very remarkable degree; even the ribs become a handsome, fresh, clean, yellow color, with a heart that is large and solid and of a beautiful, rich golden yellow color. It is quite early, and easy to cultivate. In the home garden it produces golden yellow stalks very early, which are crisp, tender and nutty in flavor. It will keep in good condition until Christmas or New Year's. Our stock of this most wonderful Celery can not be surpassed. It is grown especially for us by the originator in France. While it would pay you handsomely to plant your entire acreage in this stock of Celery, you can not afford not to give it a trial. On account of the conditions in France, stock is limited, and we ask you to let us have your order at once in order for you to be sure of securing this most valuable stock.

407 Victory Tomato

The Marvel of the Seed World. Created During The Great World War.

This wonderful Tomato has been created by the World-Renowned Hybridizer and Tomato Seed Specialist, Mr. John Baer. With his only son a soldier in France and with his own heart heavy and sad, this great friend of the trucker and market gardener not only did "his bit," but "his all," by laboring incessantly during the four long years of the great world war. Meeting failures and successes, he finally created the marvelous "Victory" Tomato.

Carefully considering all the grand, victorious points of the "John Baer" Tomato and all the splendid, strong, profitable points of the "Greater Baltimore" Tomato, Mr. Baer set for himself the great task of merging the "John Baer" Tomato and the "Greater Baltimore" Tomato together and creating the most wonderful Tomato the world has ever known.

Mr. Baer's Efforts Have Been Crowned With Success

1st. "Victory" Tomato is the most beautifully shaped Tomato the world has ever seen.

2nd. "Victory" Tomato is free from core. It produces all perfect high-crown fruit.

3rd. The color is a startling, beautiful, brilliant red.

4th. The fruit is firm, solid and heavy. Crowded full of delicious meat.

5th. "Victory" Tomato ripens perfectly right up to the stem.

6th. The development is perfect, smooth and even at both stem and blossom end.

7th. Absolutely no waste.

8th. Entirely free from wilt and blight.

9th. "Victory" Tomato ripens a little later than "John Baer" Tomato, but earlier than "Greater Baltimore" Tomato.

10th. It is a marvelous yielder. The abundance of its crops will amaze you.

11th. The flavor is distinct, mild, refreshing and delicious, entirely free from any stinging or biting acidity.

12th. Produces heavy crops of fine fruit when other varieties are complete failures.

You will see with your own eyes in your own field, and your own bank account will show why we have been willing to call this new creation in the Tomato family "Bolgiano," putting back of it our 100 years of experience, reputation and success.

Never have we received such acknowledgments from any of our new creations as we have from the "Bolgiano" Tomato. Nature, with her wonderful activities, helped by our expert selections, has produced this wonder of the Tomato family. We know the Tomato grower and his every need, whether for canning, market gardening, or home gardening, and we have always found him appreciative of our earnest efforts for his advancement.

One of our largest Tomato growers last year had confidence and planted his entire acreage with the "Bolgiano" Tomato. His crop was far superior to anything that has ever been seen. Every vine was loaded with great quantities of perfect, red, solid Tomatoes, picking as many as a bushel or more from a single vine.

The "Bolgiano" Tomato is two weeks earlier than the "Earliana," very smooth, first fruit as good as the prime fruit of the season. The heavy potato-leaf foliage protects the fruit from sun-scald and blister. It blossoms continuously. "Bolgiano" Tomato is the most wonderful producer ever known. More than 1,000 bushels have been gathered from a single acre when adjoining fields of other varieties have been almost barren.

Deep red in color, very solid, no watery seed cavities, a solid mass of meaty flesh. No tough, green core. No green streaks radiating from the stem end. Fruit does not crack, but is all smooth and selected types. Tomatoes picked ripe have been left in the sun for two weeks and remain fit for table use. Skin is very tough, flesh is sweet and tender. Will stand long-distance shipping in perfect condition. Although shipped long distances, it will appear as solid and as fresh as though just pulled from the vine. The best seller on the market stall. Plants set out on the 20th of May produced ripe fruit on the first of July. "Bolgiano" Tomato can be grown in any part of the United States with wonderful success. "Bolgiano" Tomato is accepted and acknowledged the most wonderful Tomato ever grown.

Lives and Bears Abundantly When Other Varieties Die

"Glory" Tomato is now being grown by Tomato growers in every State of the Union and in many foreign countries. The reports we have received have been, without a single exception, full of praise and appreciation of the wonderful good qualities of this marvelous Tomato.

"Glory" Tomato produces but very few seeds; the seeds are, therefore, well matured, full of life and vigor, and will germinate quickly and produce strong, vigorous, thrifty plants.

"Glory" Tomato ripens earlier than many other varieties that are usually planted for early use and is an abundant and continuous bearer.

"Glory" Tomato produces vines that are well set with fruit, bearing from the ground to the top of the vine. At times the vines are so full that they can hardly hold all the fruit that they produce. The vines are short-jointed, vigorous and healthy. So pure in type they are almost identical in all respects. They keep vigorous and green until frost and then are full of fruit.

"Glory" Tomato produces at every joint large clusters of good size, smooth, firm, beautifully shaped fruits, uniform in shape, color and size. They ripen evenly and color up well.

"Glory" Tomato yield is marvelous. The vines are fairly loaded with beautiful fruit. Many growers say "Glory" Tomato yields more per acre than any other Tomato; it has produced over 1,000 crates per acre; many single plants produce over 35 pounds of fruit apiece. Side by side with other Tomatoes, "Glory" has out-

Bolgiano's New Glory Tomato

yielded them two to one. Many Tomato growers claim it produced the largest crops they have ever grown.

"Glory" Tomato is decidedly disease resistant. It has proven absolutely blight-proof when other crops side by side were ruined by blight.

"Glory" Tomato is one of the handsomest Tomatoes grown. It has an exceptionally fine red color. Mild, delicious flavor. The fine breeding and careful selection of this strain shows up in the fruit. It is entirely free from cracks.

"Glory" Tomato being an extremely shy seeder, we suggest sending in your order as early as possible before our limited supply is exhausted.

311 Florida Special Tomato

The Greatest Blight Resisting Tomato on Earth

Not a single grower of Tomatoes in Florida, or in any locality where blight has injured the Tomato crops, should go through this season without trying this most excellent Tomato. We call it "Florida Special," for it has been most carefully bred up to resist the ravages of blight, which has been so discouraging to our Florida customers. It is red in color, large in size, fine flavored, firm and meaty, very prolific, and about as early as Earliana. It is a most excellent shipper; in fact, during our entire time of selecting and breeding up the "Florida Special" we took the utmost pains in selecting such Tomatoes as would stand the long shipment to Northern markets from Florida.

Special Stock Refugee or 1000 to 1 Beans**The Old Reliable of the South****THE GREATEST SHIPPING, CANNING AND PICKLING BEAN****Bolgiano's Special Stock Refugee or 1,000 to 1 Beans**

Extremely hardy, vigorous and productive. Is very extensively used for shipping, canning and pickling. It is the standard variety in Florida and other Southern trucking sections for Spring and Fall planting. The plants are very large, spreading, exceedingly hardy, with many small, smooth, light green leaves. Bears in great abundance pods quite solidly fleshy, brittle and of mild, delicious flavor. The matured pods are about $5\frac{1}{4}$ inches long, cylindrical, slightly curved, tapering to a slender point, medium to pale green when in condition for use as snaps. Seed long, slender, purplish, splashed with tan. This is one of the leading varieties for canners desiring a tender, fine-flavored green-pod Bean. This Bean is especially resistant to drought, cold and unfavorable growing conditions. A variety very extensively used by market gardeners both for nearby markets and long-distance shipping.

Sure Header, Very Solid, Beautifully Blanched, Crisp as Ice,
Mild, Tender, Delicious Flavor

A VERY PROFITABLE LETTUCE TO GROW

This wonderful Lettuce was grown and tested last year by thousands of Lettuce growers for both market and home use. They were unanimous in pronouncing this Lettuce to be a sure header, very solid, beautifully blanched, crisp as ice, with a mild, tender, sweet, delicious flavor. No matter how hot or how long it remains in the garden, it will keep crisp, tender and sweet. No bitterness. It will not go to seed quickly. Heads grow to the size of 24 inches around and 12 inches from tip to tip of leaf. Can be grown in open ground after danger of frost is over, all during Summer and early Fall. Never spots or turns dark in any part.

This Lettuce will please the most critical market gardeners. It is equally well suited for the home garden, near-by markets, or long-distance shipping. It does well in any section of the country.

Bolgiano's "Easy Blanching" Celery

Supreme in Quality, In Earliness, In Quick Blanching, Every Stalk Solid, Crisp and
Excellent, Spicy Flavor, Vigorous Grower, With a Beautiful
Golden Heart, Longest Keeping Variety Known

Bolgiano's Easy Blanching Celery

For many years we have been working for a Celery that would surpass all other varieties. Bolgiano's "Easy Blanching" Celery excels in quality, in earliness, in quick blanching. Every stalk is solid, crisp, with shallow ribs and excellent flavor. The plant is of medium height, vigorous grower and blanches up with a beautiful, golden heart. In developing this wonderful Celery, two distinct types appeared. One tall, the other medium. We noticed the taller type blanched to a white heart with pethy stalks. This we rejected. We then selected the medium type golden heart, which has developed far superior to our expectations. In a thirty-acre field of Bolgiano's "Easy Blanching" Celery we grew for seed this year, not a single pethy stalk was found. It is gratifying to us to offer you this wonderful Celery seed at such a reasonable price. We advise Celery growers to plant their full acreage with Bolgiano's "Easy Blanching" Celery. The amateur gardener will make a successful Celery grower by using Bolgiano's "Easy Blanching" Celery. It is the longest keeping variety known and will supply your Thanksgiving table, Christmas, and all through the season. Seed very scarce.

Black Beauty is a splendid shipper. As large as the New York Spineless Egg Plant. Two weeks earlier than the New York Spineless Egg Plant. Fine flavor. Most attractive appearance. Plants branch freely near the ground. Skin is a rich, lustrous black. Satin gloss and rich coloring add greatly to the beauty of the fruit. The intense, brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color at the blossom end. The heavy leaves which attach the fruit to the stem are bright green, making a beautiful contrast with the fine dark color of the fruit. Thoroughly free from spines or thorns. Fruit sets freely. Coming two weeks earlier than the New York Purple Egg Plant, they readily bring double the price. Do not hesitate to plant liberally of this variety as it will bring you handsome returns.

227. BOLGIANO'S SELECTED "RUBY KING" PEPPER

This is the finest selected and improved stock of the well-known Ruby King Pepper. Most carefully selected for size and yielding qualities, and remarkable trueness to type and uniformity. We supply the Southern planters with thousands of pounds of our stock of Ruby King Pepper each year, and it has become widely known for perfection of form, large size, brilliance of color, sweet and mild flavor. Plants grow two feet high and bear a fine crop of handsome, extra large, scarlet fruit. Our stock is exceptionally thick-meat, it is a heavy bearer and splendid shipper. The Peppers grow about 5 to 6 inches long and about 3 to 4 inches in diameter. The flesh is very thick, sweet and so mild it is often sliced for a salad, it is also fine for stuffing. Bolgiano's New "Early Spring" Beet

19

The First Beet in Market,
Where it Commands Fancy Prices

Bolgiano's New "Early Spring" Beet has now been given a trial by all the leading market gardeners. They have been wild in their praise of its wonderfully good qualities. It was the first Beet in market, where it commanded the fancy prices. Most perfect in shape and beautiful deep red color. It is much earlier maturing than Crosby's Egyptian and is of a much finer grain. Has a very small tap root, also top not being quite as large as Crosby's Egyptian. Even in maturing, that is, all the Beets can be pulled one week after you start in pulling. Can be sown under glass and transplanted outdoors or sown in the open field and will mature much earlier than Crosby's Egyptian. Bolgiano's New "Early Spring" Beet is the result of years of reselecting and improving, resulting in, we believe, the earliest and best Beet on the market. Seed is very scarce. It will pay you handsomely to give it a trial.

Bolgiano's Early Fortune White Spine Cucumber

The Great Money-Making Cucumber.

The Ideal Cucumber for Home or Market.

The Earliest, Best, Rich Dark Green White Spine Cucumber on Earth.

Bolgiano's Early Fortune White Spine Cucumbers All Pack Fancy and Are Far Superior to Other Sorts. Early Fortune Always Brings the Highest Prices. You Can Always Depend on Early Fortune.

84. Thousands of expert growers everywhere have proven by actual test that Bolgiano's Early Fortune Cucumber is the earliest and by far the best, rich dark green White Spine Cucumber on earth. Early Fortune is the best Cucumber for table, market or shipping purposes. It is the greatest producer of all varieties, and at all stages of its growth, it is a model in shape, being the handsomest and most attractive Cucumber ever grown.

In color, Early Fortune is a rich, attractive deep green. This inviting color it retains during a much longer period of growth than any other variety; it is so regular in form, one so much like the other, growers marvel at the purity and trueness of our stock—in fact, in selecting our stock seed these Cucumbers are so perfect it is almost impossible to say which is best.

The quality is superb, flavor delicate, refreshing and delightful, entirely free from any bitterness; being fine-grained, the flesh compact, it is exceedingly crisp and brittle, making it an ideal slicing Cucumber.

As a shipping Cucumber, "Early Fortune" can not be surpassed, as it holds up in color and quality longer and better than any other variety.

Bolgiano's Extremely Early Snow Ball Cauliflower

Bolgiano's Snow Ball Cauliflower is the earliest, most hardy and, in fact, the Cauliflower you can plant and expect a crop of true, firm, snow-white heads. Many of the beautiful, shapely heads measure from 10 to 12 inches in diameter. Bolgiano's Earliest Snow Ball Cauliflower seed is saved from absolutely perfect plants and is grown by the most experienced and largest growers of Cauliflower located all over the United States. It is the best for forcing; best for wintering over early crop, also the best for late Summer and Fall crops. Every plant will produce a fine head. Early Snow Ball is, moreover, a most desirable sort for the home garden. The plants are compact, with few short outside leaves, and are well suited for close planting. The heads are of medium to large size, solid, compact, round, very white and curd-like, and are developed earlier than any other sort.

Culture. Fibrous loam, well drained and well enriched, will raise good Beet Crop. For early table Beets have drills 16 to 20 inches apart, and sow the seed about 1 inch deep, as early as the ground can be put in good shape, or seed may be sown under glass four weeks sooner, and the young seedlings transplanted to open ground, to give an extra early crop. Give thorough and clean cultivation, and thin the plants to stand 3 to 4 inches apart in the row. For succession sow at intervals to middle of July. For earliest sowings a light dressing of nitrate of soda, say 100 pounds per acre, will sometimes work wonders.

Extra Early Éclipse Beet

3. **Early Ox-Blood. 6 Reasons Why We Introduce This New Beet.**
 1. It is extra dark blood color from end of its tap root to top of its short, graceful leaves. 2. Early as the Crosby Egyptian. 3. Almost globe shape. 4. Small amount of even foliage of deep ox-blood color. 5. Beets are very smooth and free from side rootlets. 6. Flesh fine grained, sweet and of ox-blood color. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

4. **Extra Early Eclipse.** Remarkable for its very rapid growth, the perfection of its form—which is globular—of its beautiful crimson flesh, and for its dwarf foliage. Roots are bright glossy red. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

5. **Crosby's Improved Extra Early Egyptian Beet.** An improvement on Extra Early Egyptian, being as early, but of more desirable shape, color and quality. It is very sweet and tender; a most valuable sort for early market, as it is ready before any other Beet of equal quality. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

6. **New Crimson Globe Beet. This is one of the best Bunching Beets yet introduced.** A handsome variety of medium size, almost globe shape, and entirely free from rootlets; a grand second early or main crop sort. The roots are of medium size. Beets average 10 inches in circumference. Very handsome in shape, being a little deeper than round, with a remarkably smooth surface. The foliage is small and of a rich bronze purple, borne on slender stems which occupy but a small portion of the root. Flesh is a rich blood red, slightly zoned or ringed in a most beautiful manner, making it very attractive in appearance; never stringy. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

7. **Detroit Dark Red Beet.** A splendid Beet of a dark red color for home or market. By far the best for canning, on account of its beauty. Small, upright tops and perfectly small roots. Flesh zoned with lighter and darker bands; tender and sweet. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

533. **Bassano Extra Early Flat.** A very early, tender variety of Beet. It has alternate rings of rose and flesh colors, regularly arranged. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

336. **Bastian's Extra Early Beet.** An early, large-sized, turnip-shaped Beet of the brightest red color, beautifully zoned with rings of lighter color. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

357. **Burpee's Black Red Ball Leaf Beet.** Extremely dark red in color of both foliage and flesh, deliciously sweet in flavor. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

514. **Dewing Blood Turnip.** Early, large, fine turnip form and bright red color, zoned with lighter rings. Profitable for market or home garden. An old favorite. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

571. **Half Long Dark Blood.** This is rapidly becoming a very popular sort and will probably produce more bushels from a given area than any other sort, as it does not occupy so much space in the rows as the turnip-shaped varieties. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

15. **Long Smooth Blood Beet.** Has long, smooth, blood-red roots, going well down into the soil, enabling it to resist drought and heat. Flesh very tender and sweet. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

165. **Lucullus. The New Swiss Chard or Spinach Beet.** But can be served both as Asparagus and as Spinach. Delicious. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 25c. $\frac{1}{2}$ Lb. 40c. Lb. 75c. Post-paid.

341. **Swiss Chard or Silver Beet.** Grown exclusively for the foliage, which cooked makes most delicious greens. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

11. **Extra Early Dark Red Flat Egyptian Beet.** The Egyptian Beet is one of the most popular varieties among market gardeners for forcing purposes. Justly or unjustly it is considered to be the earliest of all. It certainly will bear close planting in the valuable space under glass or in warm garden in early Spring. It is turnip-shaped, and when young is crisp and tender. In color it is dark red. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

20. **Early Blood Turnip Beet, New Improved.** It is early, smooth, does not grow overlarge, has few roots. It does not become stringy, matures a medium size, deep crimson Beet of decided uniform type. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 20c. Lb. 50c.

21. **Edmand's Blood Turnip Beet.** A handsome, clean, turnip-shaped blood Beet. Skin and flesh are of a deep blood red, sweet and tender in quality and unsurpassed for solidity and keeping purposes. The roots grow regular and are of right marketable size. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 60c.

10. **Early Large Egyptian.** None better for an early general crop than the early Egyptian; handsome shape and does not crack open. This crop commands a good market all the season. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. $\frac{1}{2}$ Lb. 35c. Lb. 60c.

13. **Lentz Extra Early Beet.** Color a deep, blood red, tender and sweet at all stages of its growth. Has small top and can be used six weeks from sowing. Very productive, a splendid keeper and shipper. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 25c. $\frac{1}{2}$ Lb. 40c. Lb. 75c.

358. **Nutting's Early Gem Beet.** Extremely early, light colored top, flesh beautifully zoned light red. Very popular as a Florida Shipping Beet. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 20. $\frac{1}{2}$ Lb. 35c. Lb. 65c.

SUGAR BEETS

For Stock Feeding

1204. **Klein-Wanzle Bener Elite.** This variety at the present time has probably a wider cultivation than any other Sugar Beet. It may be distinguished by its brighter color and its lighter colored leaves, which are beautifully undulating, and scalloped around the edges; while not as a rule equal to the Vilmorin in Saccharine richness, it is considerably more productive. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

360. **Lane's Improved Sugar.** An American variety and the best stock-feeding Beet known. It is not so sweet as the French Sugar Beets grown especially for sugar making, but the roots are

longer and finer grained; very sweet. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

1153. **Giant Feeding Sugar Beet or Hal Sugar Mangel.** This magnificent-Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, the roots for feeding purposes being really more valuable, pound for pound, than those of the very best strains of Sugar Beet, and the yield under equally favorable conditions being more than double. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

MANGEL WURZEL

Write for special prices in large quantities

Culture. Sow 5 pounds to the acre in April or June, in rows 3 feet apart, and thin to 9 inches in the row. Cultivate frequently with horse tools and you will have an abundant crop of roots for Winter use.

1151. **New Jumbo Mangel.** For milch cows and cattle generally the new Jumbo Mangel has no equal. It is a milk producer of the highest quality and at the same time keeps the cattle over Winter in prime condition. It will outyield any other Mangel two to one. It is easy to grow. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 50c.

1152. **The Gate Post Mangel.** The name indicates the immense size of this fine flavored Mangel. Among the Yellow Mangel it stands supreme. The milk it produces when fed to cows is of the richest character. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 20c. Lb. 50c.

1154. **Improved Golden Tankard Mangel.** We recommend it as the best Mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a Mangel. The color is a deep, rich yellow. The flesh is firm and solid and a rich, golden yellow in color. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

1153. **Giant Mammoth Long Red Mangel.** Our stock is a great improvement on the old variety. The roots are very large, uniformly straight and well formed. Color deep red, roots solid, tops small. Roots attain a large size. We received several reports last season of Mangels weighing 20 to 23 pounds each. Produces an immense bulk and tonnage. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

359. **Golden Giant Intermediate.** Root intermediate between the long and the globe-shaped. Flesh white, firm and sweet, much liked by cattle. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

1296. **Danish Sludstrup.** The Danish Sludstrup Mangel is considered in Denmark as the best of all Mangels, after having been awarded a first-class certificate offered by the Danish Government. It is of a distinct type, long, about 13 to 14 inches, and of a rich Orange yellow color, very hardy, which grows well above the ground, and is easily harvested. A variety which contains a very large percentage of nutriment. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 15c. Lb. 45c.

Extra Early Cabbage

25. **"Big Winner" Wakefield.** It has the same general characteristics of other Wakefield Cabbages, the heads being conical with a rounded or blunt point. It is, however, far superior to other strains of Wakefield Cabbage, being nearly double the size and better quality, and at the same time is fully as early. It has few outer leaves, permitting close planting. Large Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. Lb. \$3.50.

27. **Extra Early Express.** This, the earliest of all Cabbage, has produced marketable heads in 80 days from the sowing of the seed. It can be planted close and yields large, early paying crops. Pkts. 5c and 10c. ½ Oz. 15c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. 85c. ½ Lb. \$1.60. Lb. \$3.00.

26. **New Leader.** As early as the Wakefield, yields 12,000 heads, one-third more per acre than any other extra early Cabbage. The outer leaves are so few and so small that they can be planted very close. The heads are compact and solid from the time a head is formed and keeps so until thoroughly matured, thus enabling extremely early cutting of small, hard heads, or later when the Wakefield comes in, of large, thoroughly matured, solid, round, flat heads. Pkts. 5c and 10c. ½ Oz. 15c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. 85c. ½ Lb. \$1.60. Lb. \$3.00.

30. **Early Jersey Wakefield Cabbage, Bolgiano's Selected Stock. True Type.** The most popular early Cabbage with market gardeners all over the country. Our Stock of Wakefield is the earliest in cultivation. Every Cabbage grower should use our Wakefield: Our seed is ordered by large Cabbage growers long in advance of the time of sowing seed in order to secure our fine stock, which has never failed to produce satisfactory crops. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. Lb. \$3.50.

32. **The Charleston or Large Wakefield. The Best Large, Early Cabbage.** It can be the FIRST variety SENT TO MARKET, and on account of its handsome appearance will invariably bring the tip-top prices. If, however, the early market prices are low, it can be safely left standing in the field to mature to an extra large, compact, solid, magnificent Cabbage, and always brings better prices than any other sort harvested at the same time. Our stock is therefore reliable. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

33. **Early Large York.** This is a very valuable, early variety and follows the Express and Jersey Wakefield in heading. The heads are round, heart-shaped and firm. Its dwarf growth will permit them being planted closely together. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

28. **Extra Early Jersey Wakefield. American Grown.** An excellent, early sort. Heads formed like a Wakefield, but ten days earlier; habit vigorous, short stem and most profitable to grow. Pkts. 5c and 10c. Oz. 25c. 2 Ozs. 45c. ¼ Lb. 75c. Lb. \$2.50.

34. **Early Winnigstadt. Prize Stock.** Will produce heads of twice the size of others. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. ½ Lb. \$1.35. Lb. \$2.50.

266. **"Copenhagen Market," New Early Danish Cabbage.** As early as Charleston Wakefield. This new Cabbage is very heavy and solid, like the Danish "Ball Head" type of Cabbage; makes a fine, large, globe-shaped head with well-developed outside leaves, but is very much earlier in maturing than any of the Danish Cabbages, and makes a very fine early variety, coming in about two weeks later than the "Early Jersey Wakefield." The heads weigh 14 to 16 pounds each. The seed is very scarce this year. Pkts. 5c and 10c. ½ Oz. 15c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. 85c. Lb. \$3.00.

373. **Enkhuizen Glory.** Is a valuable, early variety. It produces fine, remarkable heads and is a splendid sort for the private garden and market gardener who grows for high-class trade. The heads are very solid, with but few outer leaves and of such compact growth to permit close planting. The quality is excellent. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. ½ Lb. \$1.90. Lb. \$3.50.

462. **Bolgiano's New "Early Spring" Cabbage.** Extra Early, Enormously prolific. Heads extremely compact and solid. A fine market sort and a superior shipper. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 35c. 2 Oz. 60c. ¼ Lb. \$1.10. ½ Lb. \$2.00. Lb. \$3.00. Postpaid.

376. **Eureka Cabbage.** An extra early flat variety. Pkts. 5c and 10c. Oz. 30. ¼ Lb. 85c. Lb. \$3.00.

29. **Extra Early Pilot Cabbage. American Grown.** Three weeks earlier than the Jersey Wakefield. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

154. **Bolgiano's Early "Square Deal" Cabbage.** The best on Earth. The heads are solid and compact, with very few outer leaves. For a fine, solid, tender, uniform, early, flat Cabbage, Bolgiano's "New Square Deal" Cabbage challenges the world. The demand for a Cabbage of this character led us by the most rigid and careful selection during the past five years to mature this Cabbage, which we are confident will give all our friends and customers a "Square Deal" every time. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. ½ Lb. \$1.90. Lb. \$3.50.

35. **Bolgiano's "New Early" Cabbage.** It forms solid, compact, round, flat heads, the leaves growing close to the head, thus allowing more cabbage to be grown to the acre than any other sort. Its earliness (a week before other early flat varieties) is one of its best marketable features. It heads so hard and so quick it becomes water proof. Pkts. 5c and 10c. Oz. 30c. ¼ Lb. 85c. Lb. \$3.00.

36. **Florida Header Cabbage.** In color, shape and size the heads are most uniform. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

37. **All Head Early Cabbage.** For uniformity, reliability of heading, size, earliness and quality it is very superior. Its heads grow compact and free from spreading leaves. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

96. **Bolgiano's "Ringleader," Large, Late, Flat, Dutch Cabbage.** Will always produce heads of enormous size and of the very finest quality. Pkts 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. ½ Lb. \$1.90. Lb. \$3.50.

50. **Louisville Drumhead. (Best of all Drumhead Cabbage.)** There is no Cabbage of the Drumhead type which can be compared with this beautiful representative in shape, color, firmness and excellent table qualities. Heat and moderate drought have little effect upon it on account of the peculiar short stem and low habit of growth. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. ½ Lb. \$1.35. Lb. \$2.50.

43. **Bolgiano's Extra Large, Late, Flat, Dutch; Market Gardener's Choicest Stock.** Can be planted later than the old-time varieties and matures more quickly into a handsome, EXTRA LARGE, solid, uniform Cabbage of perfect keeping qualities. Pkts. 5c and 10c. Oz. 30c. ¼ Lb. 85c. ½ Lb. \$1.60. Lb. \$3.00.

45. **The Lupton Cabbage.** Is a splendid late sort, heading after the second early sorts, and sooner than the Late Flat Dutch. It is particularly uniform in shape and size, holds its dark green color better than the late sorts. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

46. **Premium Flat Dutch.** It has long been the favorite sort for cold slaw and sauerkraut. It matures just before severe frost and keeps perfectly over Winter. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

47. **Large, Late, Drumhead Cabbage.** This splendid Cabbage produces enormous heads. Its good keeping qualities makes it a first-class sort to carry over Winter for long distance shipping. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. ½ Lb. \$1.35. Lb. \$2.50.

44. **Boss Flat Dutch Cabbage.** The heads are large, hard, thick and flat, the leaves lapping across the center. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. ½ Lb. \$1.35. Lb. \$2.50.

52. **Autumn King Cabbage.** It is often from 3 to 3½ feet in circumference, and weighs from 25 to 30 pounds each. Interior crisp, close, fine-grained, tender and white. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. ½ Lb. \$1.35. Lb. \$2.50.

48. **Danish Ball Head Cabbage.** This is the most excellent Cabbage, is very solid and outweighs any other Cabbage of equal size. The head is round with flattened top; a good keeper; first-class shipper and sells everywhere. Pkts. 5c and 10c. Oz. 30c. ¼ Lb. 85c. Lb. \$3.00.

463. **Danish Round Head Cabbage.** A very superior late Winter Cabbage. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 50c. ¼ Lb. 85c. ½ Lb. \$1.60. Lb. \$3.00. Postpaid.

22. **Bolgiano's Matchless, Long Island, Improved Brussels Sprouts.** Pkts. 5c and 10c. ½ Oz. 15c. Oz. 20c. 2 Ozs. 35c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

23. **Collards, Georgia Southern, or Creole.** Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves their quality. Sow thick in drills, in rich ground, transplanting when 4 inches high, or sow in drills where the plants are to remain and thin to 2 or 3 feet apart in the row when of proper size. In the South sow from January to May, and August to October. Pkts. 5c and 10c. Oz. 10c. ¼ Lb. 20c. ½ Lb. 35c. Lb. 65c. 5 Lbs. 60c. 10 Lbs. 55c.

Late or Winter Cabbage

148. **Brunswick, Fottler's Cabbage.** In this vicinity the Brunswick is considered second to none by the market gardeners. Plants are very short, stemmed; large leaves and very compact. Heads are large, flat, solid and of fine quality. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. Lb. \$2.00.

38. **Henderson's Early Summer Cabbage.** (Specialty see page 20.) In size, form, solidity and earliness this is truly a model Cabbage. It heads just after our Jersey Wakefield. Pkts 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

39. **Long Island, Early, Flat Dutch Cabbage.** The heads are large and solid and mature very early—just after the select Jersey Wakefield, and may be marketed at the same time with the Wakefield. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

40. **Early, Short Stem, Drumhead Cabbage Seed.** It is ready for the marketing 2 or 3 weeks earlier than the late Drum-heads, forms large, solid, rounded heads weighing from 15 to 25 pounds. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

41. **Henderson's Early Succession Cabbage.** A wonderful Cabbage for solidity, productiveness and fine, large heads. Matures early, has handsome color and fine quality. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

42. **Sure Head Cabbage.** (Pedigree Stock.) True American grown. Produces large, round, flattened heads that are all head, with fewer outer leaves, very uniform, firm and weighs from 10 to 15 pounds each. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. Lb. \$2.00.

542. **Solid South.** This is one of the purest and truest Cabbages ever bred. Produces very large, shapely, solid heads. It is crisp, fine grained and of delicious flavor. An excellent shipper. Pkts. 5c and 10c. ½ Oz. 15c. Oz. 20c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

53. **Bolgiano's Perfection Drumhead Savoy Cabbage.** Surpasses all varieties of Savoy Cabbage for uniformity of heads, beauty of curl and superior keeping qualities. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

49. **Mammoth Red Dutch.** It is the largest Red Cabbage and heads very solid and is deep red in color to the very center. Pkts. 5c and 10c. ½ Oz. 20c. Oz. 30c. 2 Ozs. 55c. ¼ Lb. \$1.00. ½ Lb. \$1.90. Lb. \$3.50.

375. **Volga.** One of the earliest, main crop Cabbage of superior quality. Round head, short stem, compact growth; exceptionally hardy and a good keeper. Pkts. 5c and 10c. Oz. 30c. ¼ Lb. 85c. Lb. \$3.00.

374. **All Seasons.** An "all-season" variety, equally good for Fall and Winter as for Summer use. The heads are large, solid, round, flattened on top, and of best quality. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

372. **Pe-Tsai Chinese or Celery Cabbage.** Improved Chinese Cabbage. This vegetable is new to the public, although old to the Horticulturists. Plant in July. Sow in drills 16 to 20 inches apart and the seedlings thinned two or three times. Profitable both as a shipper and market Cabbage. Pkts. 5c and 10c. Oz. 20c. 2 Ozs. 35c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

Cauliflower

Culture. For earliest Cauliflowers, raise plants by sowing in hotbed or greenhouse during January or February, and transplant to flats or cold frames, 2 or 3 inches apart each way. Set in open ground as soon in Spring as the land can be put in good order. Soil to be a warm, very rich, fibrous loam, well supplied with humus and moisture. Copious water application during dry weather, especially when the plants are heading, and light dressing of nitrate of soda and potash are of much help. Set plants 2 to 2½ feet apart each way. For late Cauliflower to mature during pickling season (August 15 to October 10) start plants in open ground like late Cabbages, and handle them like that crop. After the heads begin to form, draw leaves over and pin or tie them together to protect the head from the sun.

New Century Cauliflower

54. The Best in the World

1. It heads when others fail. 2. Large, perfect heads, measure from 12 to 14 inches in diameter. 3. The beautiful white heads are compact, deep and solid. 4. Heads will outweigh those of any other strain. 5. It is the earliest of all Cauliflower. 6. One-third more can be planted on the same space than can be done with other varieties because of its close growing compact habit. Carrots

Culture. Carrots do best in warm, deep, rather light and fairly fertile soil that is well supplied with humus, or on strong loam, having been in clover and broken the year before. For earliest crop, sow seed of the early, short-rooted sorts in April or May, in drills a foot apart and thin to 2 inches. For main crop, sow in May or June, or for succession even in July, using the long-rooted varieties. The rows for these may be 16 to 20 inches apart, and the plants thinned to 2, 3 or even 4 inches.

Celeriac, or Turnip-Rooted Celery

Culture for Root Celery. Sow the seed at the same season and give the same treatment as Celery. Transplant the young plants to moist, rich soil in rows 2 feet apart, and 6 inches apart in the rows.

139. **Giant French Celeriac.** There is not a single item of interest in the growing and development of seeds that we pass by without most thoroughly investigating and testing to see if there is something of value to our customers. To prove our watchfulness, we are here introducing the Giant French Celeriac. Many thought the Celeriac, which the Market Gardeners have had for years, was good enough, but we are always on the alert for something better, and are rewarded for our pains by being able to offer this splendid Celeriac. Culture. One ounce will produce about twenty-five hundred plants and sow about two hundred feet of row. Sow the last of March or early in April, in an open border, in rich, mellow ground in shallow drills, watering freely in dry weather. By rolling or pressing in the seed the result will be more satisfactory than when only covered. Cut the tops off once or twice before planting out, to make them stocky. When the plants are 5 or 6 inches high, transplant the dwarf varieties 3 feet and the taller sort 4 feet between the rows; plant 6 inches apart in the rows. Cultivate well and when large enough, blanch by earthing up. The first operation is that of "handling," generally done by the beginning of September. After the soil has been drawn up with the hoe, it is drawn around each plant by hand to keep the leaves firm in upright position and prevent spreading. When plants have become "set" in an upright position and the Celery is wanted for early use, they should be "banked." This is done by throwing the soil up as close to the plants as possible with a plow and finishing it with a spade, bringing the earth nearly up to the tops of the plants. The method employed now for protecting it is by covering the tops of the banks with waterproof felt paper.

Bolgiano's French Golden Self-Blanching Celery

It is used Exclusively by the Largest and Most Experienced Celery Growers and annually produces Enormous Profits. This is the finest stock in the world. Stands shipment better than any other.

71. (Specially see page 11.) While you can readily afford to put your whole crop in our stock of this **most valuable Celery**, you cannot afford to let this year go by without growing some of it. The Celery it produces will not only ship well, but will bring the highest market prices. It will create a new price for you; your commission man can get outside figures for it, and he will sell quickly all you can ship. Try our stock: YOUR PRAISES will be louder than ours. Perfect, solid, crisp, vigorous stalks; thrifty, compact growth, self-blanching to a very remarkable degree; even the outer ribs become a handsome, fresh, clean, yellowish color, with a heart that is large and solid, of a beautiful rich, golden-yellow color. It never becomes stringy or pethy. To fully appreciate its beauty and attractions, it must be seen. Many customers place their orders with us six months before planting time in order to be sure of this stock of seed. Pkt. 10c. $\frac{1}{4}$ Oz. 20c. $\frac{1}{2}$ Oz. 30c. Corn Salad

1 Ounce will sow 20 square feet, 6 pounds will sow an acre

Culture. Sow during August or early in September, in drills $\frac{1}{4}$ inch deep and 6 inches apart. If the weather is dry when the seed is sown, tread it lightly to insure germination. Keep down weeds with hoe. Just before the Winter cover thinly with straw or leaves.

24. **Large German Corn Salad.** Used as a salad and for garnishing. Pkt. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 40c. Lb. \$1.25.

Cress Cresson—Berro o Mastuerzo—Kreffo. Culture. Sow curled or pepper grass thickly, in shallow drills, every 2 weeks. It should be cut often and will continue to grow. It is useful for salad and for garnishing.

520. **True Water Cress.** Should be sown in damp soil; or if a stream of water can be utilized, they would be much finer. They will thrive well in damp hotbeds. Rightly managed, their culture is very profitable. To obtain early salad it is a good plan to sow with Water Cress Seed a strip 4 inches wide on the upper margin of the hotbed, inside the frame, where it is always cool. Pkts. 5c and 10c. Sweet or Sugar Corn

We supply packages of Sweet Corn at 5c and 10c each, Postpaid. One Quart Will Plant 20 Hills: 8 to 10 Quarts for an Acre in Hills.

Suagr Corn, weight by Parcel Post; Pts., 1 Lb.; Qts., 2 Lbs.; ½ Pk. 6 Lbs., Pk., 11 Lbs.

Culture. Seed of the sweetest varieties is liable to rot if planted in wet or cold ground. Yet if we have an early warm spell in Spring, it may pay us to take some risks. Often the plants, when once up, will escape injury by a belated light frost. Plant in warm soil 5 or 6 kernels to a hill, making the rows 3 feet apart for the dwarf or early sorts and 4 feet apart for the taller late sorts. Hills to be 2 to 3 feet apart in the rows, thin out to 3 plants in a hill. Hoe often and draw soil up to the stem, break off side shoots.

Culture. The Kales are more hardy than Cabbage, make excellent greens for Winter and Spring use, and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early Spring use sow in September, and protect during Winter. Some of the varieties are so hardy that the green leaves may be dug out from under the snow in Winter and be used for greens.

113. **Bore Cole or Kale. Hardy Winter Spargel Kohl.** The most salable, delicious and tender of all Winter Kales. About Baltimore it is sown in May, and transplanted like Cabbage to stand over Winter. It is taller than the extra dwarf varieties, and when the leaves are stripped or fall off, new tender leaves quickly grow out. Then they are again stripped off and used for marketing. It will stand the coldest Winter. Besides being a delicious vegetable, it has always been an exceptionally profitable crop, bringing money during Winter months when most all vegetables are scarce. Pkt. 10c. Oz. 20c. ¼ Lb. 60c. ½ Lb. \$1.10. Lb. \$2.00.

112. **Extra Dwarf Green Curled Scotch, or Norfolk Kale.** One of the best Kales for Spring sowing in the North; the principal sort grown South for Northern markets; hardy, and will remain over Winter where temperature does not go below zero. Very dwarf and spreading, rarely exceeding 18 inches in height. Leaves are a bright green color, beautifully curled and produced in great abundance. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 30c. ½ Lb. 55c. Lb. \$1.00.

108. **New Imperial, Very Curly, Long Standing Kale.** Beautifully curled and crimped sort; strong, vigorous habit, perfectly hardy, bright green color; very attractive in appearance; superior to all late sorts; will stand longer without shooting to seed than any other variety. Leek

Culture. Sow early in April in drills 1 foot apart and 1 inch deep. When plants are 6 to 8 inches high transplant in a deep, rich soil in rows 12 inches apart and 6 inches in the rows as deep as possible, so that the neck may be covered and blanched; draw the earth to them as they grow.

Bolgiano's Famous Mammoth King Leek

114. This stock we have by years of selection built up until it has become to those who use it a pleasure to grow and a profit, too. It has a handsome form, is very mild, agreeable in flavor, grows to double the size of ordinary varieties, is pure white, has attractive, dark-colored leaves, is stout in habit and hardy. The edible part is 8 to 15 inches long and 3 to 5 inches in diameter. It is without exception the largest and best Leek ever placed in the hands of the grower. Pkts. 5c and 10c. Lettuce

Culture. For early Summer use, sow in hotbeds in March, sowing every two weeks for succession. Transplant the young plants to rows 2 feet apart and 8 to 12 inches apart in row. For Winter use, sow in August, transplant to frames; and for this purpose the early heading varieties, such as the Millionaire Lettuce, are best adapted. The Cos varieties require to be tied up for a few days in order to properly blanch them.

Earliest Varieties

415. **Bolignano's "Masterpiece" Lettuce.** New 1920 Creation. (Specialty, see page 17.) Sure header, very solid, beautifully blanching, crisp as ice; mild, tender, sweet, delicious flavor. It is equally well suited for the home garden, near-by markets or long-distance shipping. Does well in any section of the country. A very profitable Lettuce to grow. Pkts. 10c and 25c. $\frac{1}{2}$ Oz. 50c. Oz. 90c. $\frac{1}{4}$ Lb. \$2.75. $\frac{1}{2}$ Lb. \$5.15. Lb. \$10.00. Postpaid.

380. **"Long Lost" Lettuce.** Produces large, extremely solid, compact cabbage heads. It is a reliable sure header and is very hardy. It stands the cold. It will Winter over better than Big Boston Lettuce. "Long Lost" Lettuce has both shipping and eating qualities, decidedly buttery in flavor, sweet and tender. Of a solid, bright, attractive green, never spotted or brownish in any part. As a shipper "Long Lost" Lettuce far surpasses every other Lettuce, including the Big Boston. Supply very limited. Pkts. 10 and 25c. $\frac{1}{2}$ Oz. 30c. Oz. 50c. 2 Ozs. 80c. $\frac{1}{4}$ Lb. \$1.40. $\frac{1}{2}$ Lb. \$2.65. Lb. \$5.00. Postpaid.

193. **"Bully Good" Lettuce.** No matter whether the market price is up or down, there is always a market for "Bully Good" Lettuce. Those fine, large, solid heads—a full bushel market box is barely large enough to hold 18 of them—of a bright, rich, exquisite green; with a full, solid, rich, golden yellow heart closely folded; crisp as ice; with a mild, delicious flavor, do you wonder we have named this grand Lettuce "Bully Good." The market Gardener with his pocket full of money, the Southern Grower with a big check from the Northern Cities and the Amateur Gardener with his neighbors beat to a standstill. Every one who grows for Market or eats "Bully Good" Lettuce will cheerfully admit it is worthy of its name. Pkts. 5c and 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 40c. $\frac{1}{2}$ Lb. 70c. 131. **"Best of All" Lettuce.** A sure cropper. Spring, Summer, Fall or Winter. Pkts. 5c and 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 40c. $\frac{1}{2}$ Lb. 70c. Lb. \$1.25. Postpaid.

156. **Big Boston Lettuce. Bolignano's Famous Stock.** (Specialty see page 15.) Big Boston Lettuce is the most valuable Lettuce in cultivation; its excellent qualities have made it the most popular and most extensively used Lettuce in the world. It can be grown in the open ground for Summer or Fall, in frame for Spring or forced cool in greenhouses for Winter use, producing under each condition grand large buttery, yellow heads, filled with sweet, crisp, tender, beautifully blanching leaves. Stands long without going to seed; has few outer leaves and makes a large, attractive plant. Big Boston Lettuce is specially adapted to cool, open ground culture. Our stock of this famous Lettuce is the finest in the world. Pkts. 5c and 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 55c. Lb. \$1.00. Postpaid.

425. **New York or Wonderful Lettuce.** A decidedly crisp variety; strictly cabbage head. Very large. Extremely slow to shoot to seed. Hardy, well blanching; sweet, delicious flavor. Pkts. 5c and 10c. $\frac{1}{2}$ Oz. 30c. Oz. 50c. 2 Ozs. 80c. $\frac{1}{4}$ Lb. \$1.40. $\frac{1}{2}$ Lb. \$2.65. Lb. \$5.00. Postpaid.

137. **Black Seeded Tennis Ball or Boston Market.** One of the very best for either forcing or early out-door planting. Plants good size, leaves are of good substance and of attractive dark green color. Heads are solid, crisp and tender. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 25c. Lb. 75c.

155. **New Lettuce, "Unrivaled."** An improvement on the Big Boston Lettuce, possessing earliness, large size, attractive color, etc. It can be sown almost the whole year around; it resists the Summer heat, is crispy and solid. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 30c. Lb. 90. Postpaid.

A Field of Bolignano's Famous Big Boston Lettuce

150. **Millionaire Lettuce.** Unquestionably the Earliest and far better than any other extremely early large heading Lettuce. A Lettuce fit for a king. Pkts. 5c and 10c. Oz. 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 40c. $\frac{1}{2}$ Lb. 70c. Lb. \$1.25. Postpaid.

352. **May King.** A handsome, light green, heading variety of medium size and excellent quality. Out-doors the heads mature exceptionally early, attaining a size suitable for use before other sorts, and often the edges of the outer leaves have a brownish tinge. The plant is very compact for so large a head. It is very satisfactory also for forcing under glass. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 50c. Lb. 90c.

122. **Improved White Loaf Lettuce.** After the most careful cultivation and roqueing, we have established the truest and most uniform strain of improved White Loaf Lettuce. It is planted largely in the Fall and allowed to remain in the open ground all Winter. In the earliest Spring it quickly forms most delicious, large, light-colored Lettuce heads. As a frame Lettuce it has no equal. If planted in early Spring it quickly forms heads and can be brought to market long before other Lettuce. Pkts. 5c and 10c. Oz. 10c. 2 Ozs. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 50c. Lb. 90c. Postpaid.

126. **New Early Spring Lettuce.** In the Early Spring months this splendid Lettuce produces large cabbage-like heads, which are uniform, tender, crisp and sell at highest possible prices. Our most critical Market Gardeners, year after year, bank on this Lettuce. It is also good for late Summer sowing to produce Fall Head Lettuce. Pkts. 5c and 10c. 399. **Burpee's Wayahead Lettuce.** Shows remarkable combination of earliness, firm heading character, handsome appearance and fine quality. Both in cold-frames early in the Spring and in the open ground in Spring, Summer and early Fall months, it has proven to be one of the earliest and surest heading of all early Lettuces. The outer leaves are a light green, with the inner head firmly blanched to a rich buttery yellow. Retains its good quality throughout the season and stands longer without going to seed than many other early varieties. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 55c. 574. **Salmon Fleshed Eden Gem**. Outward appearance is identical with the Eden Gem, but a trifle more uniform in size; it is the best long-distance shipping Rocky Ford strain, with a new delicious flavor and color of flesh. One of the closest netted of all melons. It is unequalled in hardness, prolificness and disease resistance. It originated with Professor Blum, of the Colorado Experimental Station. The color is almost invariably salmon, if cut at the right stage. Supply of seed very limited. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 55c. Lb. \$1.00.

548. **Burrell's Gem**. The fruit is of good size, handsome appearance and fine flavor. The skin is a rich, dark green, contrasting finely with the deep orange-salmon colored flesh; sweet, tender. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 25c. $\frac{1}{2}$ Lb. 45c. Lb. 85c. Postpaid.

164. **Paul Rose**. The fruits are nearly round, ribbed and heavily netted. The flesh is thick, of rich, deep orange color, and ripens close to the rind, with small seed cavity. It is an excellent shipper. Pkts. 5c and 10c. $\frac{1}{4}$ Lb. 25c. $\frac{1}{2}$ Lb. 45c. Lb. 85c.

162. **Orange-Fleshed Osage**. The fruits are larger than those of the Emerald Gem; nearly round in form, but having the same distinct dark green skin with lighter bands between the ribs, and thick, firm, orange flesh of fine quality. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 25c. $\frac{1}{2}$ Lb. 45c. Lb. 85c.

169. **Emerald Gem**. The melons are about the size of Netted Gem. The flesh is of a beautiful salmon color and is peculiarly crystalline in appearance, the flavor is **sweet and luscious beyond description**. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 30c. Lb. 90c.

354. **Ferry's Defender**. Medium size, flesh firm, fine grained, rich, deep yellow, highly flavored. A splendid shipper. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 25c. Lb. 85c.

Watters'
Solid Net
Rocky Ford

207. **Watters' Improved Solid Net Rocky Ford Cantaloupe**. This is the earliest strain of Rocky Ford Cantaloupes. The meat is light green, spicy and sweet. The heavy gray netting is closely laced. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 55c. Lb. \$1.00. Postpaid.

401. **Delicious Gold-Lined Rock Ford Cantaloupe**. This strain of the Eden Gem type is the result of several years' selection by one of the most progressive farmers of Rocky Ford, Colo. Shape is ideal, very slightly oval, no ribs, and it is heavily netted over the entire melon. The bloom button is small and flesh as thick at the end as elsewhere. The melon is thick meated, fine grained and sweet; color green, with a gold margin next to the seed cavity. Uniform shape, size and very superior quality. Its flesh is attractive and elicits favorable comment when served. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 55c. Lb. \$1.00. Postpaid.

167. **Eden Gem or Netted Rock Rocky Ford Cantaloupe**. This magnificent new Muskmelon is a selection of the old Rocky Ford, which it completely surpasses in lusciousness, yield, carrying, and good selling qualities. In shape it is somewhat longer and a trifle larger and closer and deeper netted. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 50c. Lb. 90c.

334. **Pollock Rocky Ford Cantaloupe**. A rust-resisting melon, with netting over the blossom end; not a long melon, but rather inclined to be short, with the finest shipping and eating qualities. The selections from time to time have reduced the size; now they crate nicely. Pkts. 5c and 10c. Oz. 10c. $\frac{1}{4}$ Lb. 30c. $\frac{1}{2}$ Lb. 50c. Lb. 90c.

337. **Knight, or New Maryland Cantaloupe**. A very popular melon with large growers and shippers; somewhat larger than the Rocky Ford or Netted Gem. We offer the original stock, which is very fine. Pkts. 5c and 10c. Oz. 15c. 2 Ozs. 25c. $\frac{1}{4}$ Lb. 40c. $\frac{1}{2}$ Lb. 70c. Lb. \$1.25.

"Cracker Jack" Peas

CANADA FIELD PEAS

1165. Here is a crop that is not only profitable, but will return to the land the much-needed nitrogen. Peas are second only to Clover in their soil-enriching qualities, and can be grown under almost any condition of soil or climate. There is always a ready market for Peas, or they can be profitably ground and fed to the stock. The vines make rich, nutritious hay. If fed to milch cows when in a green state, pods, vines and all, the flow of milk will be almost doubled. Prices: Pkt. 5c and 10c. Pt. 15c. Qt. 25c. 4 Qts. 70c. Pk. \$1.25. Bu. \$4.00.

Whitloof Chicory, or French Endive

404. Whitloof is used principally as a Winter salad, and it is most delicious served with French dressing and eaten like Cos Lettuce. The seed should be sown in the open ground not later than June, in drills 12 to 18 inches apart, and the seedlings should be thinned out to stand not closer than three inches. The plants form long, parsnip-shaped roots which are lifted in the Fall, trimmed of leaves and stored in soil in a cool place until wanted for forcing. The roots should be planted upright about 1 $\frac{1}{2}$ to 2 inches apart in a trench 16 to 18 inches deep. This will bring the neck of the root to within 9 inches of the level of the trench, which should be

FALL SOWINGS GIVE EARLIEST BLOOMS AND A LONGER BLOOMING SEASON

In November or December plant 4 to 6 inches deep giving slight protection, and they will become well rooted and grow off at the first opening of Spring and yield an abundance of bloom earlier and longer than if planted in the Spring. Use plenty of well-rotted manure and don't gather the blooms grudgingly—the more you pick them, the longer and better they will bloom.

“National” Junior No. 1 Canner

For Canning Vegetables, Fruit, Meat, Fish, Etc.

Shipping Weight 55 Pounds
Price \$20.00

Daily Capacity 200 to 400 Cans

Consists of one 12 x 18 inch steel retort, with cover, packing, etc., steam gauge, one perforated galvanized crate, one safety valve, one petcock, one triangle and one thumb nut wrench.

In order to be prepared to can all varieties of fruit, vegetables, meats, fish, etc., it is absolutely necessary to have a “Steam Pressure Canner,” as this is the only way you can be assured of perfect sterilization. A great many vegetables and all meats require a pressure of 250 degrees Fahrenheit for perfect sterilization, and the only way this can be attained is with steam under pressure. Our “National” Junior No. 1, which is illustrated above, is particularly well adapted for canning in the home and also for use by Government demonstrators. It will hold ten quart jars or fifteen pints at one loading. Tin cans may also be used. With one of our small canners you can put up enough fruit, vegetables, meats, etc., to supply the table for the entire year at a great saving.

“National” Aluminum Pressure Cooker

The high cost of living can be reduced materially by the use of our Aluminum Pressure Cooker and many hours of time can be saved by the housewife every day in the year. The outfit is complete in every detail and should be a part of the equipment of every kitchen. It is made of highly polished aluminum and the fittings are all of high-grade brass, which also adds greatly to the appearance of the cooker. The cooker may also be used for canning in small quantities.

The steam gauge registers the number of pounds pressure in the cooker at all times and is absolutely reliable. The petcock is to create free circulation of steam and should be left entirely open until all the cold air is forced out of the cooker and steam commences to pass off, when it should be partly closed. The special safety valve, which is made specially for use with the “National” Pressure Cooker, is adjustable so that it can be set at any desired point and will automatically blow off the excess steam, so as to maintain the desired pressure for the necessary length of time. This is one of the features of the “National” which will not be found in any other style of pressure cooker. There is absolutely no danger connected with the operation of it, and a complete receipt book, together with instructions for operating, are furnished with each outfit.

A Few Reasons for Canning in Sanitary Tin Cans With The Burpee Home Can Sealer

Marketable. When canning is done in the regular marketable size tin cans, much fruit and vegetables that now go to waste can be canned and sold.

Simple and Easy to Operate. The machine is simple, inexpensive, easy to operate and can be clamped to any table. One machine can be used to seal the No. 2 and No. 3 (quart) size cans. A separate machine is used for sealing the gallon cans.

Receipts. A book of reliable receipts for canning fruit, vegetables, soups, meat and fish is supplied with each machine.

Costs Less. The cost of tin cans is much less than glass-jars and there is absolutely no danger of breakage.

No Loss. When properly sterilized, or cooked, there is no danger of spoiling, as the cans always seal airtight.

Flavor Retained. The delicious flavor of the fresh fruits and vegetables is not lost when canning in tin cans, because the cans are sealed airtight before the cooking is done.

Reduces Labor and Fuel. By piling the cans one on top of another when being cooked, twice the amount can be cooked in the same time.

Queen Convertible Motor Washer

The Queen is run by a simple, strong, powerful and durable motor, made entirely of brass. There are no cogs or exposed parts.

It is Convertible. The lever can be fastened on top of the motor and used as a hand washer. In case of moving where there is no water pressure, it can be made into a hand-power machine and, of course, hand-power Queens can easily be changed to power washers.

It is your ever-ready “wash-woman.” No back talk. It does all the hard work, and pays for itself several times over each year and lasts many years. Like the hand-power Queen, it washes much faster than others, by reason of the thorough and positive agitation and peculiar construction. This means saving of much time. It is a waste of money to try to do without it. Many users say they would not do without the motor alone for \$25.00.

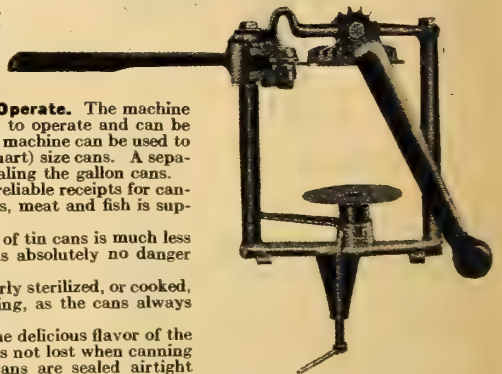

Prices: Motor washer, complete, \$20.00. Hand-power washer only, \$15.00.

No. 65 Royal Fruit Jar Wrench

Make your jars absolutely airtight. Save your hands and eliminate waste.

Price 10c each.

So-Bos-So Kilfly

**KEEPS THE FLIES AWAY FROM THE COW
INCREASES MILK PRODUCTION OVER 20 PER CENT**

DON'T let your cows suffer from the torture of flies. When their energy is used to switch the flies from their backs they can not give the maximum amount of milk. It makes them irritated and run down.

Spray the cow twice a day with SO-BOS-SO KILFLY and the flies will not bother the cows while milking or while in the pasture. Not injurious to skin. Will not gum the hair. Positive protection. Is the most effective preventive against the torture of flies known to chemical science. Has been used for over 17 years in the United States and foreign countries. Put up in gallon cans—enough for 200 cows or for one cow 100 days. 1 Qt. 60c. ½ Gal. 85c. Gal. \$1.50.

"BLACK LEAF 40"

"Black Leaf 40" Is Truly a "Contact" Insecticide

The "sucking" insects feed by inserting their sharp, slender beaks into the interior of the leaf, blossoms, etc. They can not eat plant tissue, and, therefore, can not eat poisons, hence must be destroyed with a preparation which kills by coming in contact with their bodies—in other words, by a "contact" insecticide. The most common sucking insects, with soft bodies, are the aphids (plant lice), thrips and leaf hoppers. They may be effectively controlled with "Black Leaf 40," a concentrated solution of nicotine sulphate guaranteed to contain 40 per cent of nicotine by weight. 1 Oz. 25c. ½ Lb. \$1.00. 2 Lbs. \$3.25. 10 Lbs. \$13.75.

PYROX

The great combined insecticide and fungicide.

The loss caused by insects on fruit and truck crops in this country each year is over \$100,000,000.

The damage done by fungous diseases in this country each year is estimated to be fully as great as that done by insects.

Pyrox kills all leaf-chewing insects and at the same time protects the crop against all fungous diseases.

Bolgiano's "Square-Deal" Poultry and Pigeon Foods

SOLD WITH AN ABSOLUTELY "SQUARE-DEAL" GUARANTEE

Bolgiano's "Square-Deal" Poultry Foods are absolutely the best that can be produced. Our long years of experience have taught us what ingredients and what proportions are necessary to produce good healthy vigorous fowls and increase egg production. Nothing but the finest selected, re-cleaned sound, sweet cracked grains and seeds enter into the manufacture of our foods.

"SQUARE-DEAL" CHICK STARTER A Primary Food for Baby Chicks Up to Three Weeks Old

This is a primary food for Baby Chicks; contains only the best selected, re-cleaned, sound, sweet, cracked grains and seeds in proper proportions essential to quick and healthy growth. This food should be fed in litter to induce exercise.

"SQUARE-DEAL" CHICK FOOD Quickly Develops Growing Chicks

This is a carefully selected and complete food for small chicks. It is a high-grade mixture of re-cleaned, sound, sweet, cracked grains and seeds, and is an intermediate food for growing chicks too small to eat our "Square-Deal" Scratch Food. Make them work for it; exercise promotes health and aids digestion.

"SQUARE-DEAL" GROWING MASH

Our Growing Mash is a mixture of whole, choice, sweet grains with a little meat added, evenly balanced and ground together in such a manner as to promote the quickest possible growth. Feed dry and you will be surprised at the results. Poultry of all kinds when fed dry eat very slowly, mixing it thoroughly with the saliva, and then with the acids of the stomach, consequently there is a slow digesting process going on all day. They never gorge themselves. When four months of age mix one-half Laying Mash with the Growing Mash and watch results.

Bolgiano's "Square-Deal" Beef Scraps or Meat Meal. For success with poultry it is absolutely necessary to give them plenty of animal food. For this purpose "Square-Deal" Beef Scraps are the best food that can be used.

Bolgiano's "Square-Deal" Alfalfa Meal is a green food and is very nutritious and appetizing. When fed separately steam well before using.

Bolgiano's "Square-Deal" Crushed Oyster Shells. The best poultry authorities recommend the "Grit-Box" system. Our fresh ground shell supplies Carbonate of Lime to increase the production of eggs. Poultry, pigeon and chick sizes.

Owing to the unsettled condition of the grain market it is impossible for us to make prices that will hold, therefore ask that you kindly write us for lowest quotations.

"SQUARE-DEAL" POULTRY FOOD A Scratch Food of the Highest Grade—Contains Sunflower Seed

This is a combination of carefully selected, re-cleaned, sound, sweet grains and seeds—the food that keeps the fowls vigorous and healthy; when fed in deep litter, keeps the fowls active. The busy hen is always profitable.

"SQUARE-DEAL" POULTRY MASH MAKES HENS LAY

It is a complete scientifically prepared mash of carefully selected mixture of re-cleaned, sound, sweet ground grain and green food, etc. It contains proper proportions essential to producing big egg yield.

"SQUARE-DEAL" PIGEON FOOD—No. 1

This food is a carefully selected mixture of re-cleaned, sound, sweet grains and seeds; especially adapted for pigeons and squab fattening. It is exceptionally helpful at moulting time.

"SQUARE-DEAL" PIGEON FOOD—No. 2

Wonderful Flying Mixture; without wheat, corn, grit or shell. It is composed of carefully selected, appropriate, re-cleaned, sound, sweet grain and seed, especially adapted to flying pigeons.

"SQUARE-DEAL" PIGEON FOOD—NO. 3.

Without corn, grit or shell, but contains some wheat. It is composed of carefully selected, appropriate, re-cleaned, sound, sweet grains and seeds, specially adapted to flying pigeons.

"SQUARE-DEAL" PIGEON FOOD—NO. 4

This pigeon food does not contain any cracked corn, wheat, grit or shell, but is composed of flint corn and carefully selected, appropriate, re-cleaned, sound, sweet grains and seeds, especially adapted to fancy pigeons.

BOLGIANO'S "SQUARE-DEAL" FEEDS are manufactured under the constant and careful supervision of our competent chemist, whose duty it is to see that the raw materials used are of the proper high quality, that the proportion of each is correct, and that the processing is right. This assures you and your customers of absolute uniformity. Every sack of "Square-Deal" Feed is the same—there is no variation.

Many experiments with a number of combinations of various feedstuffs were made before Bolgiano's "Square-Deal" Feeds were perfected. We are always sure beyond the shadow of a doubt that any article that we recommend and which we put under our "Square-Deal" Label is top notch in its particular class. So it is with "Square-Deal" Dairy, Horse and Hog Feed. Our experiments have shown that we are not only on the right track, but that we have reached the goal of perfection toward which we have been striving.

“Buckeye” Incubators—The Perfect Hatchers

Are Guaranteed to Hatch MORE Chicks and BETTER Chicks Than Any Other Incubator

No. 14
Style E

Weight, crated for shipment, 55 lbs.
Capacity, 60 eggs. Price, \$18.50

No 14 is especially adapted for use by the small raiser. It has all the important features of the larger machines, such as visible thermometer, and the Buckeye heating and ventilating system. The temperature is easily regulated and the consumption of oil is low.

FIREPROOFED. Inspected and approved by the National Board of Insurance Underwriters. Every machine is built in accordance with the strict rules and regulations of the Underwriters' Laboratories and bears their label of approval. Hence, they are an acceptable risk with every insurance company in the world.

No. 1—Capacity 110 eggs..... \$43.50
No. 2—Capacity 175 eggs..... 51.50
No. 3—Capacity 250 eggs..... \$65.00
No. 4—Capacity 350 eggs..... 77.50
No. 5—Capacity 600 eggs..... \$120.00

WHY THE BUCKEYE SUCCEEDS

The unprecedented success which has followed the Buckeye for twenty-five years is primarily due to the invention of the Buckeye hot-water system. Too much emphasis can not be attached to the importance of keeping impure gases and fumes out of an incubator. Instead of passing the hot-air fumes through the incubator, with a likelihood of leakage in the conductor at any time, we heat the hot water on the outside—send it circulating around the egg chamber—and keep all the fumes from the lamp on the outside. It takes but a very small portion of lamp fumes to kill the developing chicks, and by circulating hot water through the egg chamber instead of hot air we entirely eliminate all possibility of damage to the eggs.

No. 16 Style E. 120 Eggs. Price, \$31.00

All Style E incubators have single walls and are equipped with galvanized rust resisting heaters.

No. 17. 200 Eggs. Price, \$42.50

New Oil-Burning Brooders

These Brooders were designed to meet the demand for a portable Brooder to sell at a lower price than the “Security.”

These new Brooders will be known as “Buckeye Portable Brooders,” and numbered as follows:

No. 21—22-in. diameter, capacity 100 chicks. Price..... 17.00
No. 22—30-in. diameter, capacity 150 chicks. Price..... 21.50

This is a wonderful line of brooders and they will fill a long felt want.

The Standard Colony Brooders

Broods 1,000 Chicks. Price \$31.50. Coal Burning. Self-Regulating. Chicks Always Visible.

The Most Remarkable Coal-Burning Brooder Ever Invented.

It is Self-Feeding, Self-Regulating, Simple, Safe, Everlasting, and the Guaranteed Operating Cost is Less Than Six Cents a Day.

The Standard Coal-Burning Brooder is now manufactured in two sizes and numbered as follows:

No. 18—Standard Brooder, 52-inch Hover and large stove. Price..... \$25.50
No. 19—Standard Brooder, 42-inch Hover and stove. Price..... 31.50

The Standard Colony Brooder is **guaranteed** to do everything that any brooder on the market will do—and do it better—no matter what the other brooder costs.

Improved Roller Tray Incubators

No matter how correct the principle upon which an incubator is built, unless high-grade material is used in its construction, it will never prove satisfactory and in a short time be practically worthless. For this reason we have spared no expense in making the Roller Tray Incubator of the best material obtainable.

The Improved Roller Tray Incubators are finished in natural color, each machine being given a coat of shellac and then coated with varnish specially adapted to withstand heat and moisture. The glass door is of double thickness, with air space between.

Beekeepers

To our customers who have bees, and to those who are interested in this vocation, we wish to announce that we have secured a good stock of standard goods to meet the average beekeeper's needs. We can get no better line of supplies than we have secured. It is the well-known **ROOT QUALITY GOODS**, and it will give entire satisfaction. We stand back of it with our own guarantee, and it is also supported by the guarantee of **THE A. I. ROOT COMPANY**, of Medina, Ohio, the manufacturers.

We will only describe a few of the articles and hives we are stocking. We have a special catalog on supplies and appliances for beekeepers, and ask you to write for one of them.

SECTION HONEY BOXES

4¼x4¼x1 7/8 Inches Wide with Two Beeways

4 1/4 SQUARE BEEWAY

4X5 PLAIN

4x5x1 3/8 Plain Section, no Beeways

These sections are made of clear white basswood and fold without breaking.
Furnished in packages 100, 250 and 500 in either style.

ROOT SMOKERS

Standard

Jumbo

Root Smokers are so well known that they need no introduction. We carry both Standard and Jumbo sizes, in copper and tin.

COMB FOUNDATION

Medium Brood

Thin Super

We carry fresh comb foundation, without which it is quite difficult to secure straight, perfect worker comb in the brood nest or straight, marketable sections of comb honey in sections.

COWAN RAPID REVERSIBLE EXTRACTOR

For the producer of extracted honey the centrifugal extractor is very necessary. By means of this machine the honey is thrown from the comb and the comb is returned to the hive to be refilled and time again.

The 1919 edition of the **ABC and XYZ of Bee Culture** contains 850 pages of real information on bees. It is arranged alphabetically, making it a fine reference book in time of doubt.
